

## Canon R. J. Pierce Briefly Reviews Stewardship In Farewell Sermon Sunday

Thanks His Parishioners For Loyalty And Cooperation During The Four Happy Years—Asks Same Loyalty For His Successor—Pays Tribute To Grande Prairie Municipal Hospital—Asks His Listeners To "Press On Toward The Mark."

Christ Church (Anglican), Grande Prairie, was filled to capacity on Sunday night to hear Canon R. J. Pierce in his farewell sermon on the eve of his departure for British Columbia, after being rector for four successful years. Canon Pierce spoke as follows:

"In the New Testament you will find the sentence, 'I press on towards the mark.' Tonight I would leave that sentence with you as my last message. For tonight we have reached the parting of the ways, and I must preach my last sermon to you as your rector. In it I want to try to review something of my stewardship, to consider the present, and to

## Rev. Canon, Mrs. Pierce Guests Of Honor At Banquet

Presented With Generous Gift Of Money On Eve Of Their Departure For Saanich, B.C. Upwards Of Ninety Present—Regrets Expressed On All Sides At Canon And Mrs. Pierce's Leaving.

There were upwards of ninety covers at the banquet in Speke Hall, tendered Canon and Mrs. Pierce by the W. A. of Christ Church on the eve of their departure for Saanich, near Victoria, B.C.

Following partaking of the wonderful banquet, Mayor P. J. Tooley, who was master of ceremonies, after expressing regrets felt by everyone on Canon and Mrs. Pierce's leaving, gave a brief history of the church during the last twenty-five years. He recalled the first meeting of the vestry, which was held across Bear Creek for the purpose of making arrangements for the building of a new church which has served so well up to now. Mr. Tooley stated that it is the intention to build a new church in the near future.

"We have been fortunate in having for rectors of this church men of high calibre," observed His Worship, "and then addressed himself to the stewardship of Canon Pierce, saying, 'By the quality of his work he has succeeded in endearing himself to us and his departure is deeply regretted.'"

Mayor Tooley then extended a welcome to the new incumbent, Rev. T. D. Jones, and concluded by extending a lay reader by Canon and Mrs. Pierce for a safe journey and success in their new field.

He then called upon Sanger Davies, lay reader, who presented Canon and Mrs. Pierce with a generous gift of money.

E. V. Bergin, of Clairmont, who was next introduced, observed that it was through Canon Pierce that he was appointed a lay reader by the Bishop, adding that anyone appointed to such a position can consider it a privilege to be proud of. Continuing, Mr. Bergin said:

## New Agriculturist Takes Over Duties At Grande Prairie

G. S. Black, who for the last three years was District Agriculturist at Grande Prairie, and family left by car on Saturday for Edmonton, where Mr. Black will take over his new duties with the Department of Agriculture as Live Stock Promoter.

W. S. Scarth, who was District Agriculturist on the north side of the Peace, with headquarters at Berwyn, arrived on Saturday to take Mr. Black's place. He was accompanied by his wife and little son.

The Scarths have taken up residence in the house vacated by the Blacks.

## New Telephone Line From Beaverlodge To Wembley

Alberta Government Telephones is building a new line from Beaverlodge to Wembley via Huxley. This will give additional long distance service from Grande Prairie to Beaverlodge. The sixteen miles of new pole line carries new copper.

A new copper circuit was recently constructed from Fairview to Berwyn, which gives Fairview a new line to the town of Peace River. This line is now in operation.

The recent construction is in keeping with the policy of the department to improve the service in the Peace River.

## FIRE-FIGHTERS VISIT G. P.

Arthur Sherman, fire ranger, with some twelve of his fire-fighters, spent Wednesday afternoon here, after fighting fire for the past month southwest of Grande Prairie.

Sherman stated to The Tribune reporter that very little good timber was destroyed in the district under his supervision.

## BLUEBERRIES FIND READY SALE

Joe Dickinson, merchant at Elmworth, was in Grande Prairie on Thursday with a carload of blueberries. The berries, which were of exceptional quality, found ready sale.

look to the future. And because it is extremely difficult, you will forgive me if I do it briefly.

"For four years now we have travelled through life together. For my wife and myself they have been happy years; I hope they have been equally happy for you. Certain events have left outstanding memories during those years. I remember the first morning when I stood nervously in this pulpit, the night when I was inducted to the cure of your souls—and it saddens me to think how far I have fallen short of fulfilling the high responsibility that was set upon me that night. I remember visits from our Bishop, mid-night celebrations on Christmas Eve, happy carol services, Easter Communion, quiet services during the week.

"We are not many here at Christ Church, our church is rather old, rather worn, but together we have tried in the quiet and hallowed place to bring to God the best offering of worship we knew. In the parish you have always received me graciously into your homes and given me a warm welcome there. When you have been sick, I have tried to point you to the comfort that comes from God. At this point may I pay tribute to one of our local institutions that has been much criticized of late—I refer to our hospital. From matron, doctors, and nurses alike I have received unfailing courtesy and kindness, and I have been given access to any patient who desired to see me at any hour of the day or night. I have knelt beside quite a few deathbeds in this parish, and seen the Spirit of God comfort those who mourned. I have seen the joy on the faces of those to whom God has recently given that most precious of all gifts—a new-born child. Our own daughter was born here. By virtue of my office I have had the happiness of receiving some seventy children and grown-ups into the fold of the Church at Holy Baptism. Some of you I have married, some of you I have prepared for Confirmation; all of you I have tried to teach—the younger in Sunday school, the older from pulpit and lectern. And you in your turn have taken generous care of my material needs, that I might continue to minister among you. What does it all mean? What is the common purpose binding all these actions together?"

## Northern B. C. Can Support Thousands In Food Stuffs

Says J. H. Tillman, Building Contractor, Portland, Oregon, Who Accompanied By Three Other Of His Townsmen Made The Trip Northwest By Boat And Returned By Plane To Edmonton—Remarks On The Hospitality And Friendliness Of The People They Met.

That the Fort Nelson area is capable of maintaining thousands of agricultural products was a statement made by J. H. Tillman of Portland, Oregon, building contractor, at the Grande Prairie airport on Monday morning, after he had been interviewed by The Tribune reporter.

Accompanied by his son, John, Walter Jones and Tom Westerling, Mr. Tillman made the trip to Fort Nelson country by boat. He said the trip was wonderful and gave the party an opportunity to get a close-up on the country travelled through. Swift-running waters at places added a thrill to the journey, and Mr. Tillman, who went on to say that in the Fort Nelson country they saw wonderful gardens, in which tomatoes were ripening in large clusters, and splendid corn.

"That country is capable of maintaining thousands in foodstuffs if there were only a way of getting in and out of it. How much better it would be to have people settled in the fertile valleys of that country than to have men tramping the streets of our cities looking for work," observed the visitor, who added that the trip was made for pleasure and education.

Mr. Tillman then remarked on the hospitality of the country. "From Edmonton north we met the most courteous people I have ever met," stated Mr. Tillman, who added that they have time to talk to you. Another member of the party said that the majority of the people south of the line think that Canada, being north of the United States, is necessarily cold and barren. We learned on this trip that this is not so. On the contrary, we now know that this country is most fertile."

Mr. Tillman contrasted the slow method of travelling by boat with the fact that it took 148 hours to go from Fort Simpson to Fort Nelson, a distance of 40 miles. On the way out it took 120 minutes to travel from Fort Nelson to Fort Simpson, a distance of 200 miles. "I consider air travel, considering time saved, is cheaper than any other form of travel," Mr. Tillman remarked.

Conversation then switched to conditions in the United States. Mr. Tillman said that it was a deplorable fact that about two-thirds of the people in the country south of the line are living on taxpayers' money, or printed money. "This condition," he added, "cannot go on." Building on American Pacific Coast is very dull, and as a result the lumber business is also dull.

The party will travel home by car, which they will pick up at Edmonton. So delightful and educational did they find the trip, the Portland men intend to return next summer and further explore the country in northern British Columbia.

## CLAIM JAPANESE ARE SHORT OF AMMUNITION

NANCHANG, Aug. 25.—Chinese soldiers here claim the Japanese fighting opposite them are short of ammunition. They assert also that 20 per cent of Japanese artillery projectiles are proving duds and the percentage of unexploded naval missiles is even higher. Two duds were identified by arsenal markings as made in 1918.

BASKATCHEWAN FARMERS OVERJOYED AS THEY HARVEST A GOOD CROP. For the first time in eight years there is general rejoicing in the Prairie as harvest time arrives and prospects of an excellent crop are assured. These pictures, taken near Regina, show the farmers in small communities reaping oats with all kinds of antiquated implements.

## Summary of Work of Grande Prairie School Division No. 14

### MEMBERS G. P. CHINESE RED CROSS COMMITTEE'S TRIP TO NORTH SIDE SUCCESSFUL

J. Marvin and Bill Mark of Grande Prairie, members of the Chinese Red Cross Society, returned on Saturday from a trip to the north side of the Peace in the interest of the society's cause.

They covered all points, including the Battle River country, from Hines Creek to Grouard and report that a considerable sum of money was collected.

On the trip they distributed Chinese Red Cross buttons to various organizations.

### "BOSS" SHEPHERD SEES MANY CHANGES IN BLOCK SINCE HE LEFT IT IN 1915

"Boss" Shepherd and Mrs. Shepherd were passengers on Monday's train, en route to their home near Salt Lake City, Utah.

Seen at the station by The Tribune reporter, Mr. Shepherd, who home-stayed on land between Peace and Coupe and Rolla in the early days, remarked: "I didn't know the country, so many were the changes. I was agreeably surprised to see such good crops, as I had been led to believe that they were almost a complete failure."

"Old landmarks familiar in the old days had disappeared, and I felt very much of a stranger in the country in which I knew every inch in the old days," observed the pioneer settler. This was Mrs. Shepherd's first visit to this country and she stated that she enjoyed every minute of the time.

### TRIBUNE'S PICTURE PAGE WORTH THE MONEY, SAYS J. PARKER, DAWSON CREEK

Hugh Anderson and Jack Parker of Dawson Creek were business visitors to Grande Prairie on Saturday. Parker, who renewed his subscription to The Tribune, remarked that the picture page carried each week by the paper is worth the price alone. Jack, who sold out his garage at Dawson Creek two years ago, now specializes in tractor repairing. Anderson is one of the old-time guides of the North.

### Latest Plane News

The big tri-motor from the west landed at the Grande Prairie airport Monday morning, with Ted Fields at the controls. Passengers: John Tillman, Walter Jones, and Tom Westerling all of Portland, Oregon, from Fort Nelson, en route home. Colin Reed, from Fort St. John, W. J. Powell, from Charlie Lake, E. Clarke to Edmonton, and "Wop" May. "Wop" took a trip down town to meet some old friends while the big boat was being fuelled. On Thursday Ted Fields arrived with the tri-motor from Edmonton. Passengers: Mrs. Bob Sharp and two children of Sexsmith; Jessie McLean for Wanham; Mr. McPherson of the Dominion Weather Bureau, for Lower Post, Yukon; "Red" Powell and Wes. Bentley to Fort St. John. On this plane was a rush order of vaccine for the dreaded brain disease among horses. The vaccine was in turn shipped to W. Caldwell's farm north of town.

Pilot Kubicek arrived later in the day from Fort St. John with Mr. and Mrs. O. B. Harris from Prince George, who had been visiting in Vancouver. He had aboard the Yukon mail.

### BAND CONCERT OCT. 14

Grande Prairie Band, under direction of Bert Churchill, will hold a band concert and dance in the old Capitol Theatre, Friday, October 14. Keep this date open.

## LATEST NEWS FLASHES

COLOMBO, Ceylon, Aug. 23.—Major Lindeman, one of the German military advisers to Chinese General Chiang Kai-Shek recalled by Berlin, Monday predicted a revolution will break out in Japan within the next 18 months unless Japanese troops score a decisive victory in China. The German strategist said the Japanese invasion of China was similar to the ill-starred Russian campaign of Napoleon and would meet the same fate.

BONNYVILLE SALT FLATS, Utah, Aug. 24.—Captain Eyston drove his big automobile through the measured mud at 347 miles per hour Wednesday, but failure of an electric timing device on the return journey robbed him of a new record. "I don't feel the run was at all in vain, for the Hazard Campbell, socially prominent stock-broker, were flying tripped across a group of electric and telephone wires and plunged into a field a short distance from this valley."

EAST AURORA, N.Y., Aug. 24.—Commander Frank Hawks and a companion were killed Tuesday night in a flaming aeroplane crash less than a year after Hawks gave up the speed flying which had made him famous. The machine in which he and Hazard Campbell, socially prominent stock-broker, were flying tripped across a group of electric and telephone wires and plunged into a field a short distance from this valley."

LONDON, Aug. 24.—Dark prophecies of an August upheaval in central Europe with Hitler's legions again on the march, this time against Czechoslovakia, have given way in London to a belief that no new crisis will afflict the continent for weeks to come. The pact just signed between Hungary and the nations of the Little Entente is regarded here as valuable insurance against Hungary making an alliance with Germany and thus facilitating Nazi domination of the whole Danube Valley. The Little Entente nations' guarantees of security for each other's frontiers constitute a further check to Germany's expansion plans, as they mean that Rumania and Jugoslavia now are now linked with Hungary against any attempt by Germany to treat the smaller Danube countries as she treated Austria.

A total of 30 credits each. The lessons were prepared and marked by the Western Canada Institute of Calgary, by authority of the Department of Education, Edmonton.

This information is given for the benefit of any other high school students in the Peace River District who may be considering taking lessons by correspondence.

The Department markings are as follows: 80 per cent or over, honors; 65 to 79 per cent, A; 59 to 64 per cent, B; 40 to 49 per cent, C.

### THINK WAR IN CHINA NEAR END

TOKIO, Aug. 25.—Well-informed Japanese believe the war in China is nearly finished. "The air is thick with peace," one high ranking government official has put it. It has been an undeclared war and informed Japanese believe it will be an undeclared peace. They claim it will gradually peter out.

### SECRETARY FOR BASSANO VISITS GRANDE PRAIRIE

Mr. and Mrs. J. N. Donaldson arrived home this week from Bassano, where they attended the funeral of Mr. Donaldson's mother. They were accompanied by his father, J. E. Donaldson, who has been secretary of the town of Bassano for the past eighteen years.

In reply to a question put by The Tribune reporter, Mr. Donaldson, Sr., said the crops around Bassano were the best in several years and the average of wheat was placed at between 15 to 18 bushels per acre.

Mr. Donaldson, who is on his vacation, will remain here for two weeks, during which time he hopes to see considerable of the country.

### RETURN FROM ENJOYABLE TRIP

Rev. C. E. Fisher of Forbes Presbyterian Church, Grande Prairie, and family have returned from a vacation trip which took them as far as Victoria, B.C.

At Okotoks, on the way out, they picked up their son, Ronald, who accompanied them.

Mr. Fisher was very much pleased with the performance of his Willys car. He stated to The Tribune reporter that they made the 4,000 miles at an average cost per mile of a cent and a quarter for oil and gas.

## W.I. Lucky, Dimsdale Dist., Killed Wed. When Mules Ran Away With Binder

Working in The Field Alone When Accident Occurred—Was Highly Successful Farmer, And Last Year Built \$5,000 Home—Funeral Will Be Held On Saturday Afternoon, At 2:30, From McLaurin Baptist Church, Grande Prairie.

William I. Lucky, oldtimer in the Dimsdale district, was found dead in a field a little after dinner-time on Wednesday.

Failing to come to dinner at the usual time, one of the men went to the field in which Lucky was cutting grain and found him lying on the ground dead. The mules and binder were standing in the field some distance away.

Just what happened will never be known, but it is thought that Mr. Lucky was standing in front of the binder, oiling some of the parts, when the horses took fright and ran away. It was evident that Lucky was crushed by the bull wheel.

The funeral will be held on Saturday at 2:30. Services will be held in McLaurin Baptist Church, Grande Prairie.

## SCHOOLS TO OPEN SEPT. 1

Arrangements are being made to have all schools in the Grande Prairie School Division No. 14 opened on Thursday, September 1st, 1938. All students contemplating taking Grade IX, X or XI by correspondence courses should write for particulars to MR. L. A. WALKER, Inspector of Schools, Grande Prairie, Alta.

## Bill Drynan Returns From Trip To The Yellowknife Field

Is Struck With Surface Showing Of Gold—Much Free Gold In Evidence Made Trip To North In Eleven Days Running Time—Returned By Plane To Peace River—All Boys From Here Have Work.

"If the surface showing goes to depth, the Yellowknife mining field will be the richest in Canada." This statement was made to The Tribune reporter by Bill Drynan, who arrived home from the field on Friday.

Discussing the Yellowknife field further, Bill, who is an old Klondyker, said that there is a great deal of free gold, more than he had ever seen before, but he added, it will take at least two years before it is definitely known what the deposit of gold is.

There is great activity in the field and many were stacking claims, observed Bill, who went on to say that the Consolidated Mining & Stamp Company is down 500 feet, with good showings all the way, and have a 100-ton stamp mill in operation.

The Nugan Mining Company is down 200 feet, with good showings to this depth.

Yellowknife, remarked Bill, is growing rapidly. There are three restaurants and one hotel. Meals cost one dollar.

All the boys from this section are working and well satisfied, said Bill, who added "That is the place for a young man."

## Fire Totally Destroys Dunlop's Barn And B-A Service Station

Loss Of Barn Estimated At Upwards Of \$3,500, Partially Covered By Insurance—Will Build Again Immediately—Service Station Insurance But Equipment Of The Operators Not Insured.

Fire of unknown origin last Friday morning totally destroyed the Dunlop barn of Chas. Dunlop just across the street from the post office. The fire was discovered a few minutes past 8 o'clock when billows of dense smoke were seen pouring from the building and in a few minutes the whole structure was in flames. Archie Wilson ran to the fire hall and rang the bell, but when the fire department arrived the fire had made such headway that the fire-fighters were powerless to control it, even with the aid of the booster pump, and the building burned to the ground.

In the meantime the fire had swept across a narrow lane and gutted the B-A service station to the east. Louis Stojan's garage nearby and the Ford garage across the street were also in danger. The north wall of the post office almost felt the heat of the big blaze. Quite a strong north-west wind was blowing, which added to the danger.

Ferris Phelps and "Red" McNairn, who operated the station, stated that their equipment destroyed, with no insurance. The building itself was partially covered.

A truck belonging to Hughie Moon who was standing between the two buildings was driven out just in the nick of time.

Mr. Dunlop said the fire started in the back of the barn. In addition to the building, the service station and other items were burned and estimates his loss at between \$3,000 and \$3,500.

Mr. Dunlop informed The Tribune that he will begin immediately the construction of a new barn.

## Reunion Canadian Corps Wonderful Gathering

Dave Carlisle, who served with the Sixth Field Engineers in the Great War, arrived home from Toronto, where he attended the reunion of the Canadian Corps.

Mr. Carlisle stated that the reunion was wonderful. There were over 100,000 veterans there from all parts of the Dominion.

"The French village located in the Exhibition Grounds proved the centre for the vets," observed Mr. Carlisle, "and the food was excellent. Each man wore his divisional colors. Mr. Carlisle was the only representative from the Peace River country."

Mr. Carlisle visited his mother at Peterborough, who although over 80 years of age, he found in good health. He also visited the mining field in northern Ontario.

## Town Councillors Deal Largely With Routine Business

Passing of accounts and dealing with regular business took up the time of the town fathers at a meeting of the Grande Prairie town council meeting held Wednesday night. Accounts passed for payment were: General, \$503.36; indigent hospital, \$10.50; mothers' allowance, \$16; child welfare, \$82.37; indigent relief, \$69.80; unemployment relief, \$40; labor, \$94.84. Total, \$816.87.

The Mayor reported progress was being made in connection with the application for a loan under the Municipal and Provincial Assistance Act. Progress was also reported on the installation of the water and sewer system.

## EDMONTON LIVE STOCK

EDMONTON, Aug. 25.—Up to noon salesmen quoted \$8.50 on trucked-in hogs.

## Bill Drynan Returns From Trip To The Yellowknife Field

Is Struck With Surface Showing Of Gold—Much Free Gold In Evidence Made Trip To North In Eleven Days Running Time—Returned By Plane To Peace River—All Boys From Here Have Work.

"If the surface showing goes to depth, the Yellowknife mining field will be the richest in Canada." This statement was made to The Tribune reporter by Bill Drynan, who arrived home from the field on Friday.

Discussing the Yellowknife field further, Bill, who is an old Klondyker, said that there is a great deal of free gold, more than he had ever seen before, but he added, it will take at least two years before it is definitely known what the deposit of gold is.

There is great activity in the field and many were stacking claims, observed Bill, who went on to say that the Consolidated Mining & Stamp Company is down 500 feet, with good showings all the way, and have a 100-ton stamp mill in operation.

The Nugan Mining Company is down 200 feet, with good showings to this depth.

Yellowknife, remarked Bill, is growing rapidly. There are three restaurants and one hotel. Meals cost one dollar.

All the boys from this section are working and well satisfied, said Bill, who added "That is the place for a young man."

## POPULAR NURSERY TRAVELLER IS FOUND DEAD IN HIS BED

Isaac Thompson (59), passed away on the farm of John Bjornstrom at La Glace on Tuesday, August 16. When Mr. Thompson failed to report for breakfast, Mr. Bjornstrom went to enquire the reason and found him dead. He had passed away during the night.

The funeral was held August 23, service being conducted in Oliver's undertaking parlors. Rev. A. Willis Cann officiating. Burial took place in the Grande Prairie cemetery.

Deceased, who represented a nursery, covered the Grande Prairie for many years and was widely and favorably known. He was born in Norway, and so far as is known no relatives live in Canada.

## HOQ PRICES LOWER

Bacon hogs last Saturday brought \$5.25 at Grande Prairie. This is a drop of 25 cents against the price paid on the previous stock shipment two weeks ago. Hog shipments were light from the Peace River. There were four cars shipped from Grande Prairie, one of hogs and three of cattle. This was about the proportion all along the line.

## THE NORTHERN TRIBUNE

AN INDEPENDENT WEEKLY  
NEWSPAPER

Published every Thursday at Grande  
Prairie, Alberta.

Holder of Alberta "Better Newspapers"  
Said "The Year" of 1937-38.

The Tribune's aim is to thoroughly  
"cover" the local news field with fair-  
ness to all sections and parties, also  
to aid in the development of the Peace  
River Country and help make known  
this northern inland empire's many  
advantages as a home land. All news  
is printed without intentional distortion.  
The paper's opinions are expressed  
only in its editorial columns.

Letters for publication are wel-  
comed. A pen name may be used, but  
correspondents must also sign their  
proper names, not necessarily for  
publication, but as evidence of good  
faith. In publishing a communication  
The Tribune does not imply agree-  
ment.

Subscription Rates:  
One Year, in British Empire... \$1.50  
One Year, in United States... \$2.00  
Legal and other advertising rates  
furnished on application.

J. B. YULE, Editor.

### BETTER BUILD BRIDGES THAN FORTS AND BATTLESHIPS

The other day another international  
bridge was opened, this time at Ivy  
Lea, near Kingston, Ontario, at  
which the President of the United  
States and the Premier of Canada  
were present.

At ceremonies held at Queen's  
University, when the honorary de-  
gree of Doctor of Civil Laws was  
conferred upon President Roosevelt,  
he said: "I am glad to see that the  
people of the United States will not  
stand idly by if domination of Cana-  
dian soil is threatened by any other  
empire." What greater mark of  
friendship could be uttered than this  
pledge?

How fortunate we are in lying  
close to a powerful nation whose  
President pledges friendship in a  
most practical way. We are not  
alone in the world. We are part of  
the people of the United States who  
stand idly by if domination of Cana-  
dian soil is threatened by any other  
empire.

Due to that friendship which exists  
between these two nations Canada  
enjoys enviable security, without  
fear of attack from the south.

For over one hundred years no  
hostile shot has been fired across  
our international boundary line,  
which in this war-torn world is one  
of the brightest spots in the world.

The friendship which has existed so  
long between United States and  
Canada, is, judging by the speeches  
delivered at Kingston, developing  
into a permanent policy, which de-  
clares that the world, that these two  
democracies will combine forces  
against European or Asiatic powers  
who would attempt to destroy the  
democracy of either nation.

What would this nation as a  
nation of eleven million people in  
Europe, where the policy of the  
powerful nations is to absorb the  
weaker countries? We would be in  
constant fear of attack. But, lying as  
we do beside a powerful but friendly  
nation, we go about our business  
unmolested and working out our  
civilization as we understand it.

The best way to continue this  
splendid friendship is to build inter-  
national bridges and other com-  
mercial facilities instead of forts and  
battleships along our three thousand  
miles of international boundary.

### WHO ARE THE ARYANS

For some time Hitler has been  
engaged in a purge to drive Jews out  
of Germany. The reason given is  
that he desires that the people of  
Germany shall be only those of  
Aryan blood.

Mussolini, to round off his goose-  
stepping policy, has followed Hitler's  
lead and is also persecuting the Jews  
and making a miserable farce out  
of that they will have to leave Italy.  
The Italian dictator has all at once  
discovered that the Italians are  
Aryan, and like Hitler he wishes to  
keep his people pure-bloods, and  
hence the purge.

Now the question is what peoples  
are of pure Aryan blood.  
Everyman's Encyclopedia says that  
the Aryan race belonged to Asia, the  
eastern part of ancient Persia. The  
name is now used commonly for the  
Indo-European races and was origi-  
nally given to the Sanskrit-speaking  
immigrants who came from India,  
and was also adopted by the ancient  
Persians.

The Encyclopedia further says that  
it is universally maintained that  
about three or four thousand years  
ago there lived in the eastern part  
of the same race in some part between  
the Hindu-Kush Mountains and the  
Caspian Sea, and called themselves  
Aryans. Although no written testam-  
ents of their race are known, their  
tongue, yet the character and habits of  
these people have been inferred from  
facts revealed from philological re-  
search.

Italy is made up of many races,  
having been overrun from the north  
by several tribes.

How the two dictators are going to  
pick out the pure Aryans in their  
respective countries is not clear, but  
this distance. To say the least, it is  
going to take some sifting if the work  
is to be done intelligently and sci-  
entifically.

The attempt to separate the Aryan  
race from others is simply so much  
foolishness, as it is doubtful if such  
a race of people exists today. In  
every move toward the various  
races eventually got mixed with  
other tribes and lost their original  
basis.

Although in the minds of people  
of today the Prussian is classed as a  
Teuton, as the matter of fact the  
Prussians originally were Slavs, part  
of a tribe that moved westward.

England is a mixture of many  
races, yet there would be just as  
much sense in trying to clear out  
pure breeds in that country as it is  
to isolate pure Aryans in any part  
of the world.

This attempt to do so is just so  
much fanaticism, which only results  
in the persecution of other races, who  
have a right to a place in the sun.  
This policy of persecuting peoples  
not deemed to be of Aryan blood  
from the brains of dictators drunk  
with power and cannot last, for the  
reason it is just so much bunkum.

### Along the Trail

By J. B. YULE

#### AS ONE IRISHMAN TO ANOTHER

A recent issue of the Christian  
Science Monitor carries a picture of  
Denis Mulligan, Director of the  
Bureau of Air Commerce, talking to  
Douglas Corrigan, who flew the  
Atlantic from New York to Dublin  
in an "old crate." Corrigan stuck

to his story to the official that it was  
all a mistake. "I flew the wrong end  
of the needle of my compass and  
went in the opposite direction from  
what I intended." The picture shows  
Corrigan scratching his head and  
laughing.

Could anyone imagine a man by  
the name of Mulligan clamping down  
on a young man by the name of Cor-  
rigan, even if he did disobey the  
federal air traffic laws? It just isn't  
done among the Irish.

Let me see the picture, a  
fitting caption under the cut would  
be: "Corrigan Telling Mulligan How  
He Went Wrong Again."

### Dad's Notions

By E. S. Stanley

Your body is not you, but the  
machinery that takes you around.

Starting with but little more than  
this machinery, the machinery first  
receives all the solid food and care;  
but as the growth of the body, and  
another element, CHARACTER, must  
also receive attention. To neglect  
the developing of the character with  
the body is a tragedy. The body-  
machine has whims and fancies, likes  
and dislikes, appetites and aversions.  
It has a communicative system of  
nerves which variously react to con-  
ditions or circumstances, and thus it  
feels pleasure, and sorrow, and pity,  
and anger, etc., on occasion.

A will, also, has this body-machine,  
strong and persistent. Except it is  
controlled by the sensible boss,  
Reason, it leads us into many diffi-  
culties and foolish habits, on the one  
hand; and holds us back and makes  
us unfaithful during the other.

Body-machine like it insists on hav-  
ing its way. The pleasure of the  
senses is its concern. We've eaten  
enough, but it starts begging and  
crying for more—merely the pleas-  
ure of taste. We've been depleted  
what promises to be a thrilling, spell-  
binding story, and there is no rest  
till we read it, merely for the thrill—  
we go the other way, and destroy mem-  
ory, and undermining character. It  
sees others attired in strange cos-  
tumes and it seeks to follow their  
lead. It sees others polluting the  
land and it provides for it by making  
with nicotine-laden clouds of smoke,  
and it does likewise, not from  
pleasure this time—for at first the  
whole machine arises in revolt and  
declares that it is not to be soiled  
by such a thing. But then, the  
democracies will combine forces  
against European or Asiatic powers  
who would attempt to destroy the  
democracy of either nation.

Not for this nation as a  
nation of eleven million people in  
Europe, where the policy of the  
powerful nations is to absorb the  
weaker countries? We would be in  
constant fear of attack. But, lying as  
we do beside a powerful but friendly  
nation, we go about our business  
unmolested and working out our  
civilization as we understand it.

The best way to continue this  
splendid friendship is to build inter-  
national bridges and other com-  
mercial facilities instead of forts and  
battleships along our three thousand  
miles of international boundary.

The best way to continue this  
splendid friendship is to build inter-  
national bridges and other com-  
mercial facilities instead of forts and  
battleships along our three thousand  
miles of international boundary.

### WHO ARE THE ARYANS

For some time Hitler has been  
engaged in a purge to drive Jews out  
of Germany. The reason given is  
that he desires that the people of  
Germany shall be only those of  
Aryan blood.

Mussolini, to round off his goose-  
stepping policy, has followed Hitler's  
lead and is also persecuting the Jews  
and making a miserable farce out  
of that they will have to leave Italy.  
The Italian dictator has all at once  
discovered that the Italians are  
Aryan, and like Hitler he wishes to  
keep his people pure-bloods, and  
hence the purge.

Now the question is what peoples  
are of pure Aryan blood.  
Everyman's Encyclopedia says that  
the Aryan race belonged to Asia, the  
eastern part of ancient Persia. The  
name is now used commonly for the  
Indo-European races and was origi-  
nally given to the Sanskrit-speaking  
immigrants who came from India,  
and was also adopted by the ancient  
Persians.

The Encyclopedia further says that  
it is universally maintained that  
about three or four thousand years  
ago there lived in the eastern part  
of the same race in some part between  
the Hindu-Kush Mountains and the  
Caspian Sea, and called themselves  
Aryans. Although no written testam-  
ents of their race are known, their  
tongue, yet the character and habits of  
these people have been inferred from  
facts revealed from philological re-  
search.

Italy is made up of many races,  
having been overrun from the north  
by several tribes.

How the two dictators are going to  
pick out the pure Aryans in their  
respective countries is not clear, but  
this distance. To say the least, it is  
going to take some sifting if the work  
is to be done intelligently and sci-  
entifically.

The attempt to separate the Aryan  
race from others is simply so much  
foolishness, as it is doubtful if such  
a race of people exists today. In  
every move toward the various  
races eventually got mixed with  
other tribes and lost their original  
basis.

Although in the minds of people  
of today the Prussian is classed as a  
Teuton, as the matter of fact the  
Prussians originally were Slavs, part  
of a tribe that moved westward.

England is a mixture of many  
races, yet there would be just as  
much sense in trying to clear out  
pure breeds in that country as it is  
to isolate pure Aryans in any part  
of the world.

This attempt to do so is just so  
much fanaticism, which only results  
in the persecution of other races, who  
have a right to a place in the sun.  
This policy of persecuting peoples  
not deemed to be of Aryan blood  
from the brains of dictators drunk  
with power and cannot last, for the  
reason it is just so much bunkum.

### Along the Trail

By J. B. YULE

#### AS ONE IRISHMAN TO ANOTHER

A recent issue of the Christian  
Science Monitor carries a picture of  
Denis Mulligan, Director of the  
Bureau of Air Commerce, talking to  
Douglas Corrigan, who flew the  
Atlantic from New York to Dublin  
in an "old crate." Corrigan stuck

to his story to the official that it was  
all a mistake. "I flew the wrong end  
of the needle of my compass and  
went in the opposite direction from  
what I intended." The picture shows  
Corrigan scratching his head and  
laughing.

Could anyone imagine a man by  
the name of Mulligan clamping down  
on a young man by the name of Cor-  
rigan, even if he did disobey the  
federal air traffic laws? It just isn't  
done among the Irish.

Let me see the picture, a  
fitting caption under the cut would  
be: "Corrigan Telling Mulligan How  
He Went Wrong Again."

## A Place By The Side of the Road

By Arthur Jackson

Following a week of the usual  
mess of news events that fill daily  
papers and radio channels these days,  
it was a restful and inspiring expe-  
rience to spend a few hours last  
Saturday afternoon at Beaveridge  
Experimental Substation.

As I entered, we were read or hear of  
the daily wantonness of members of  
the human race are guilty of, cannot  
help but ponder on where the road  
we are following will take us, and  
what will happen to us as we con-  
tinue to tread its tortuous path.  
Some of the signs along the road are  
clear and bold—especially those  
pointing to Destruction; but the signs  
pointing to Life and Happiness are  
few and are almost obliterated by  
disregard and neglect. War cannot  
fail to have its effect. Greed and  
selfishness are seen everywhere.

## Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright

"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

August showers bring September flowers.

Stork thrashing with a custom outfit helps to give every man his neighbor's weeds.

If frost comes the more important crop is possibly not whether the crop is cut or not but whether it is ripe or not.

With a light crop the fields are soon cleared for autumn grazing and autumn tillage even though stacking may become necessary in a few cases.

Pessimists who in bumper seasons bewail the fact that big crops are hard on the land should find plenty of consolation in the North this year.

Three cases of actinomycosis (lump jaw) in humans are reported by a Peace River country doctor. The ray fungus was found and was in at least one case traced to slight wounds in the mucous membrane admitting the organism.

For a number of years after the iris was introduced at the Substation it did quite well and promised to prove hardy. Of later years the mortality has been heavy. A mid-August check-up counted 56 survivors out of some 300 planted.

Blanching celery with earth has in most instances given better results at Beaverlodge than blanching with boards. Earth mounds sometimes ward off an early frost when plants in boards completely succumb. Since celery has often been spoiled for keeping by September frosts, the protection afforded by earth banking is worth while.

Whether to let annual weeds ripen on the summerfallow or to break the surface crust in effort to destroy them? That is the question. We vote to subdue the weeds. One shepherd's purse plant may, according to mathematical calculation, be the mother of 40,000 and the grandmother of 1,600,000,000. Unfortunately they do not all sprout together but linger to appear provokingly month after month and year after year.

Some time ago a type of root harrow with a laminated frame was described in Timely Hints on the strength of a correspondent's recommendations. The author of the idea now writes candidly to admit that his harrow has given out because snow and rain penetrating between the plank layers rotted them when left outdoors. He suggests that anyone having such a harrow should store it indoors or at least stand it on edge over winter.

**Potato Diseases**  
It never fails. Each summer the potato inspector has a new virus disease to point out. First it was mosaic, then leaf roll, then wilt, then giant hill, then witches' broom. This year it is purple top, formerly thought to be associated with the incipient stage of witches' broom but now held by the Americans to be a distinct disease, though they admit they do not know much about it. The Substation's stock of Irish Cobbler which passed a good inspection last year and the year before went down this year with purple top, denoted by a general rosette, unhealthy, dwarfish appearance of the vine, a purplish stem and a lack of much tuber development, with some small plants appearing at the ends of the rootstocks. Tuber-unit propagation and selection is the suggested process for building up healthy stocks, but the way seems long and devious. One wonders how far apart the units would need to be spaced in a field. Possibly if they were spread out across a summerfallow it would avoid infection of one plant stock by a diseased neighbor. The nature of some of these diseases and the way they are spread does not seem too fully understood.

**Northern Wheat Samples Wanted**  
An excellent bulletin entitled "The Production and Quality of Cereal Crops in the Park and Wooded Areas of Alberta," prepared by Dr. K. W. Neatby and Dr. A. G. McCalla, has been lately issued by the University of Alberta. At the front of the bulletin is a blank form to be filled out and sent in to the Department of Field Crops, University of Alberta, Edmonton, Alta., by any farmer

willing to cooperate by sending in a one-pound sample of his 1938 wheat crop for use in the quality survey of wheat grown in the park and wooded areas. It is desirable that this survey be continued for at least two years more and that the samples obtained be representative of the whole park and wooded country. An immediate return of the forms is requested or (if the bulletin is not at hand) a letter may be sent to Dr. Neatby. Any northern Alberta grain grower who has not the bulletin should send for it, and though we are not authorized to promise this publication to others, it is possible that the offer will hold for rural residents of the Peace River Block of British Columbia.

**Swamp Fever**  
At the Baldernell Illustration Station Field Day on August 10, 1938, Dr. A. Knight, Provincial Veterinarian of British Columbia, discussed animal sanitation in general. Interviewed later in the week about swamp fever, he mentioned having encountered two cases of it in the Block, both south of the Peace. One farmer had lost 11 horses from it in three years. His scoop-out receives barnyard drainage.

Swamp fever is rather a mysterious disease the germ of which is believed to occur in sloughs and slough water. An infected horse passes the germs in the manure, hence it is well to keep stable drainage out of watering ponds and to keep horses from running on manure piles, where they pick up the odd wisp of straw or feed.

For treatment of swamp fever an internal antiseptic is prescribed, say two tablespoonsful of turpentine in 1 to 1½ pints of raw linseed oil, the dose to be repeated in about three days, although one must watch the purging action of the oil. Then administer in the daily feed a teaspoonful of iron sulphate night and morning in the grain feed, which may be oats, oat chop or oat bran. Gentle exercise should be given and the patient quarantined, the manure being taken care of so that other animals will not be affected.

**Off-Colored Garnet Straw**  
A sample of off-colored Garnet straw taken from a field south of Berwyn recently was submitted to the Dominion Laboratory of Plant Pathology at Edmonton. The crop in question was very thin and would not return much more than the seed. The laboratory reports:

"As indicated in your letter, reddish to purple to blue to gray color which occurs in the sheath and peduncles exposed to light, and not on the stem protected by the sheath, is no doubt due to the unfavorable environmental conditions, principally the lack of moisture. The effect of such conditions in creating a deficiency of some particular element, or, more probably, an unfavorable balance of the elements, resulting in such a high anthocyanin production, has been observed fairly frequently during the past years in Alberta and Saskatchewan."

**E. C. Stacey.**  
**Vitamins by the Package**  
Cod liver oil has been the most trusted source of supply of Vitamin D, that elusive factor which promotes the assimilation of calcium and phosphorus by the blood serum. "The Sunshine Vitamin" is another name for Vitamin D, since its activity is promoted through the irradiation of the skin by the ultra violet rays of the sun. These act on the sterol, a naturally occurring source of Vitamin D in all bodies. Ergosterol, it seems, is the form in

which the sterol occurs in plants, whereas cholesterol is the form in which it is present in animals. Cholesterol occurs in the brains and spinal cords of beef animals, which have been thus utilized in the preparation of an activated pro-Vitamin D of standard, constant strength. B. Leslie Emslie, in his Farm News Letter, informs us that an activated animal pro-vitamin produced by the irradiation of cholesterol with ultra violet rays has after five years in the laboratory stage proven in practice to be at least 50 per cent more effective than any other source of Vitamin D. It is incorporated with milk powder. The material is put up in pound packages, each sufficient for mixing with a ton of feed.

Besides being cheaper and of standardized higher potency Vitamin D in the milk powder form is claimed to have several practical advantages over cod liver oil.

Perhaps we shall yet live by tablets after all!

### BOTANICAL NOTES FOR SEPTEMBER

(Experimental Farms News)

The arrival of September suggests to many people the end of summer and consequently a season of dirge and lamentation; others would sing psalms to the relief of cooler nights of sweet repose which the turn of the year brings with that soft gauzy wishfulness of the countryside, so devoid of large violet or magenta-purple flowerheads.

And so, dressed in gold and royal purple, September, as with a fanfare of trumpets, hails the harvest. It is all very wonderful this march of For's year, which starts with the primitive catkin-bearing families and ends triumphantly with the newest and most complex of the composites to which the goldenrods and asters belong.—E. W. Hart, Division of Botany and Plant Pathology, Science Service, Ottawa.

**ENGLAND HAS NEW WHEAT YIELD 10 P.C. HIGHER THAN EXISTING BRITISH VARIETIES**

A new type of wheat yielding at least 10 per cent higher than the best existing British varieties has been evolved after lengthy research. It is rust resistant and able to withstand heavy storms because it grows short. The cross-bred grain has not yet been named. It is the result of intensive research for ten years by Professor F. L. Engledow of the Cambridge Plant Breeding Institute.

Grown on test plots four feet square on the grounds of the National Institute of Botany at Cambridge, the new wheat has been cut. Its color has not yet been fixed but the seed will be released for commercial production once whiteness is assured. The discovery is considered to be a valuable contribution to the campaign to increase the production of home-grown food in the United Kingdom.

**TIP FROM POULTRY EXPERT**  
—KNOW BEFORE ENTERING HENHOUSE, PREVENT ALARM  
Before going into the privacy of the henhouse it's a good idea to rap on the door, says H. W. Titus, a poultry expert at the national agricultural research station at Beltsville, Maryland. "Then the chickens know what to expect, come to attention and face the door," he explains. "There is no fluttering—no alarm."

Otherwise, the birds are apt to get excited, flutter, and injure themselves.

### BARLEY AREA INCREASED EXPANSION IN EMPIRE DUE TO RECOVERY IN CANADA

The world area under barley, which has fluctuated irregularly since 1930, appears to have increased in 1937, states the Imperial Economic Council, as compared with 1936, but precise comparisons with earlier years cannot be made in the absence of recent figures for the Soviet Union. The British Empire area, which comprises about one-seventh of the world total, declined until 1933-34. Recent years have shown a slow expansion, due partly to the recovery in Canada. The chief markets for imports of barley are found among the European countries, though large quantities are exported from Canada to the United States, which in 1936 took 70 per cent of the Canadian shipments.

Tell and Sell with a Tribune ad.

account of its prolonged angled stem adorned with small clusters of flowers, in much the same manner as *S. caesia*, but its saw-edged leaves are oval. In the swamps and peat bogs the Bog Goldenrod (*S. uliginosa*) sends up two to four feet high a densely flowered oblong terminal spike of flowers; its short branches are so appressed that it has a wand-like effect. The leaves are long and narrow; the lowest often measuring nine inches long. But perhaps the best known of all are the Canada Goldenrod (*S. canadensis*) and the Tall Goldenrod (*S. altissima*) which transform whole acres into lakes of gold with their waving plumes of pyramid-shaped clusters of flowers. One much resembles the other, but the Tall Goldenrod is taller and has larger flowerheads, while Canada Goldenrod has nearly the smallest flowerheads of them all.

The asters or Michaelmas daisies (so-called because the feast of St. Michael falls on September 29) form another large and complicated group of plants, and are, in many cases hard to tell apart. But a few can be named at sight: such as the Large-leaved Aster (*A. macrophyllus*), so-called because of its three or four conspicuous leaves on long stems in a clump near the ground. It grows in shady places as does the heart-leaved Aster (*A. cordifolius*) with its masses of pale lavender flowerheads. But the best of them all is the New England Aster (*A. novae-angliae*) with its huge branching clusters of large violet or magenta-purple flowerheads.

And so, dressed in gold and royal purple, September, as with a fanfare of trumpets, hails the harvest. It is all very wonderful this march of For's year, which starts with the primitive catkin-bearing families and ends triumphantly with the newest and most complex of the composites to which the goldenrods and asters belong.—E. W. Hart, Division of Botany and Plant Pathology, Science Service, Ottawa.

### ENGLAND HAS NEW WHEAT YIELD 10 P.C. HIGHER THAN EXISTING BRITISH VARIETIES

A new type of wheat yielding at least 10 per cent higher than the best existing British varieties has been evolved after lengthy research. It is rust resistant and able to withstand heavy storms because it grows short. The cross-bred grain has not yet been named. It is the result of intensive research for ten years by Professor F. L. Engledow of the Cambridge Plant Breeding Institute.

Grown on test plots four feet square on the grounds of the National Institute of Botany at Cambridge, the new wheat has been cut. Its color has not yet been fixed but the seed will be released for commercial production once whiteness is assured. The discovery is considered to be a valuable contribution to the campaign to increase the production of home-grown food in the United Kingdom.

### NEW PRISON REGULATIONS MEAN EARLIER RELEASE FOR CONVICTS IN CANADA

Retrospective feature of the new prison sentence remission regulations that became effective August 15th will mean the shortening of the terms of many convicts now in federal prisons.

Changes in regulations, recently announced by Hon. Ernest Lapointe, justice minister, were designed to give immediate effect to some of the recommendations of the royal commission on Canada's penal system.

The new regulations provide that good conduct remission allowances may be earned from the first day in the penitentiary. Former regulations provided a convict had to be in prison six months before he could earn time off. As good conduct remissions have approximated four days a month this feature, being retroactive, gives an immediate 24-day reduction to many prisoners.

### PREVENTING FOREST FIRES IS ONLY WAY PRESERVE TIMBER

Forest fires are the great menace to British Columbia's prosperity and ordered growth. Every year we have them with us—every year the threat, though happily not always the destruction that this year has seen.

It is not good enough to fight these forest fires when they come. We should be doing something to make sure they do not come, to snuff them out instantly if they do appear. This means care and organization and the expenditure of money.

The forest itself yields a great return. In spite of the destruction, it will continue to do so for years. But that return is not so much revenue as capital turned over. We should treat it as capital and plow back into the forests as much as is deemed necessary for the forests preservation. Forest patrol, forest protection and forest roads and research, reforestation—they are all necessary if we are to keep this great public asset on which not only our prosperity but our existence depends.

### REGULAR SCHEDULE TAKES PLANE TO THE POLAR SEA

The airplane is making further encroachments on the territory where a short time ago the husky and reindeer were the only means of transportation.

Aerial conquest of the Arctic wastes through regular commercial flights was carried through successfully first in North America. Settlements in Victoria Land, lying north of the 71st parallel of latitude were connected by plane with the temperate zone.

The summer time-tables in Europe now show a similar schedule between Berlin and the little Lap town of Petsamo, lying on the fringe of the Polar sea at 70 degrees north latitude. The flights via Helsinki require 15 hours. Thus, by using this "Arctic Air Express," the traveller who leaves Berlin in the afternoon can spend the night in Helsinki and arrive at this tip of north Finland before evening.

### THE FINE RECORD OF OUR CANADIAN BANKING SYSTEM

Canada's banks and Canada's insurance companies have given a good account of themselves. They have contributed in a large way to the building up of this young country. They have been criticized on many occasions, of course, but that does not prove they are wrong. The principal complaint against the Canadian banking system is that it is too conservative. The best answer to this is that during the long years of depression, when financial institutions fell by the hundreds across the line, every Canadian bank remained in business, met its obligations fully and carried on in a normal way. Indeed, nothing contributed more to maintaining the national morale, the national confidence, than the fine record of our banks. And the same thing was true of our insurance companies, large and small.—Windsor Star.

### MAKING IT CLEAR

When Queen Mary visited Benares as the Princess of Wales, she was much amused to see a banner that was stretched across the road along which the royal procession was to pass with the following inscription: "God Bless the Princess Female."

The stories we had to read at the back of the barn as kids now come in on the radio.

### HIGH HATS ARE WORN BY CHIMNEY SWEEPS, BREMEN

High hats are not always a sign of riches, according to H. A. W. Richter, Hamburg, Germany, travel authority who reports that in Bremen they are the trademark of chimney sweeps. High hats and Eton jackets for years have been the uniform of the profession. It is a common sight for travellers to see a group of "sweeps" mounted on bicycles going off to work, with their coiled ropes over their shoulders and high silk hats perched on their heads.

### RUST STORM HITS JAPAN

A rust storm which struck the western part of Tokachi Province in Japan, ruined most of the crops and covered all the houses with a thick layer, destroying five factories and several other buildings.

### HAD AFTERNOON'S WORK

It took an assistant a whole afternoon to check payment of an account made by a customer at King Williamstown, South Africa. The customer had sent a wholesale firm £12 (\$60) in penny stamps in settlement.

Baseball originally was played with a flat bat.

## They Know the Reason

Those grain producers who support Alberta Pool Elevators by delivering their grain thereto are clear-sighted, far-sighted people who can discern the benefit to their industry in giving patronage to an organization which is thoroughly co-operative in every respect and is striving to advance the cause of agriculture in every possible way.

Patronize

## Alberta Pool Elevators

## It Is YOUR Elevator

You do not need to be a shareholder of the Company to think of the United Grain Growers Elevator as your elevator. It was built by a Farmers' Company for the use of farmers, and the successful record of the Company has been made possible by the continued patronage of many thousand farmers.

DELIVER YOUR GRAIN TO

## UNITED GRAIN GROWERS LTD.

Elevators at: Grande Prairie, Sexsmith, Clairmont, Wembley, Dimadale, Beaver Lodge, Belloy, Dawson Creek, Hualien, Hythe, Pouce Coupe, Prentville, Rycroft, Wanham.

## The SNAPSHOT GUILD

DECORATIVE SILHOUETTES

Since the puppy is likely to move, a photographic flash bulb, which gives an instantaneous flash of light, was used in making this silhouette.

PHOTOGRAPHIC silhouettes are a source of decorative pictures—and camera fun—which every snapshotter should try. The arrangements are simple—a white sheet stretched over a doorway, or division between two rooms, with a strong light behind it and the camera set up in front.

By arranging his subjects in front of this brightly illuminated sheet, the clever photographer can construct any number of imaginative or story-telling pictures. Costume snaps are particularly interesting in silhouette, and there are possibilities for many humorous pictures of the "it-can't-be" variety.

For instance, a jagged can be pictured keeping a lamp or two balls or bottles in the air at one time, or a camper can be pictured with two skillets, flipping a dozen flapjacks at one shot. In both these pictures, the objects to appear in the air would be cut from black paper or cardboard and pinned to the sheet at proper points.

The sheet must be stretched evenly, as wrinkles will show in the pictures. Lighting behind the sheet should also be as even as possible. Five feet is a suitable distance from lamps to sheet.

John van Guilder.

## Interesting News From Sexsmith

Vol. VII. No. 10

By R. A. MACLEOD

August 23, 1938

### SEXSMITH PARAGRAPHS

Mr. J. A. Foote, who was out to Edmonton for medical treatment, arrived home on Friday's train in much better shape than when he went out. Mr. Neil McNab also returned on the same train. Mr. McNab was away for a month's holiday, spent in Saskatchewan and Manitoba. While in Regina he visited with his brother, the Hon. Archie McNab, Lieutenant-Governor of Saskatchewan, whom he had not seen for a number of years.

Mr. and Mrs. Wm. Hall and family, accompanied by Mrs. Lewis and Mrs. Bob Sharp, left by car for Edmonton last Friday afternoon. Mrs. Lewis and Jack Hall are on their way back to Des Moines, Iowa, where Jack will continue his education. Mrs. Shaw is looking after the store during their absence.

Mr. and Mrs. Foster returned on last train from Kimberley, B.C., where they visited Mr. Malcolm Gillies. Mr. Foster states that Malcolm is looking in the pink and wishes to be remembered to all his old friends in Sexsmith.

Mr. J. A. Weicker was rushed to the Grande Prairie Municipal Hospital last Wednesday, expecting that he would have to be operated on. However, this was not found necessary and he came home again on Saturday. Although still a little shaky, Hank is on the mend and expects to be as well as ever again in the course of a few days.

The Maple Leaf Petroleum, a co-operative oil company, is building a warehouse in Sexsmith and expects to be operating within a short time. Bill Miller will be the agent.

### CENOTAPH NOW COMPLETED

The Cenotaph, erected by the Canadian Legion, Post 60, of Sexsmith, is now completed, with the exception of the bronze plaque, which has not as yet arrived. It is constructed of reinforced concrete and is four feet square and nine feet high. It is pyramidal in shape and is crowned with the nose cap of a German shell from Vimy Ridge. Eventually it will be surrounded with a chain fence, 20 feet square.

### MATT BADUIK HAS GOOD CROP

After hearing all the weeping and wailing about the poor crops it is refreshing to hear about an occasional good one. In conversation with Mr. Matt Baduik, who lives just north of Buffalo Lakes, he stated that he harvested a 28-acre field of wheat last week and used up eight 8-pound bags of twine or 84 pounds. Matt estimates that he will at least get 35 bushels to the acre. This is on new breaking.

### WILLING TO EXCHANGE BULL MET ON TOWN'S MAIN STREET

We noticed a poster hanging in one of the local offices, signed by the Minister of Agriculture, with a broad black heading, "Bull Exchanged," and were wondering if by any chance this would refer to the bull one hears along the street. Any exchange for this article would be all to the good.

### RINK NEARLY COMPLETED

The new skating rink is just about completed, and it is probably one of the best rinks in the north country. The ice surface is 85 feet by 180 feet, with a covered shelter all along one side for spectators also accommodation for spectators along two other sides. All corners are rounded. Along the front will be ticket office, janitor's room, two separate rooms for the hockey teams, and a large waiting room for the public. Before the partitions are put in it is expected that there will be a dance pulled off in the near future. Watch for the announcement.

### TO WINTER PHEASANTS

Mr. Frank Sumner has just received three English pheasants, two hens and a cock, which he will winter, and expects to hatch out a number in the spring. These pheasants will not hatch their own eggs while in captivity, but the cock will be taken and put under a domestic hen. Mr. Sumner did this last spring and had quite a success, but when same were hatched out the domestic rooster looked askance at them, and probably thought there was "something rotten in Denmark."

### SCHOOL TO OPEN SEPTEMBER 1

The Sexsmith school will open on Thursday, September 1, for all classes. All children will be eligible to start if they are six years of age, providing they will be the full age of seven on or before June 30, 1939, or

in other words, during the school term.

High school pupils from the district, who are contemplating attending the Sexsmith school this term for grades 10 and 11 are requested to get in touch with the secretary, Mr. G. H. Sharp, as soon as possible. The teaching staff is as follows: Mr. T. W. Nordon, high school principal; Mr. J. H. Blockidge; Miss H. Muttart; and Miss D. Koebke.

### SEXSMITH AND DISTRICT ANGLICAN SERVICES

REV. H. E. WEBB, Rector.  
Sunday, August 28  
11:00 a.m.—St. Alban's Church, North Sexsmith.  
3:00 p.m.—St. John's, Buffalo Lake.  
7:30 p.m.—Emmanuel Church, Sexsmith.

### SCENIC HEIGHTS

**HARVEST VERY EARLY**  
SCENIC HEIGHTS, Aug. 20.—The cutting will soon be finished in the Scenic Heights district for another year, and crops being unusually light the threshing will not take long. The harvest this year was much earlier than other years. Showers of rain during the past week were a welcome change to the dry weather we had all summer, but we hope we get what crops we have threshed safely before it rains too much.

The new barn at the school was completed a week ago. It is much larger than the old one was. There should be plenty of room for all scholars' horses.

We expect school will re-open about September 1. Mr. Fred Howlett will resume his duties as teacher.

Quite a number from this district attended the show, "Snow White and the Seven Dwarfs," last Wednesday afternoon. They all report a very pretty and interesting picture.

### WIN AT LA GLACE TENNIS TOURNAMENT

A tennis tournament was held at La Glace last Sunday. The winners of the doubles event were Mrs. E. H. Keith and Mr. O. Anderson, and the singles was won by Dr. G. M. Gagey of Sexsmith. Everyone had an enjoyable time in spite of the rather cold, cloudy day.

Mr. and Mrs. Norman Edgar were business visitors to Wembley Saturday afternoon.

Mr. Archie Edgar of Wembley is stooking for his brother, Mr. Gordon Edgar.

Mr. Myron McKeeman is stooking for Mr. E. H. Keith.

Doris Anderson of La Glace spent a few days with Marjorie Keith last week, taking in the show Wednesday afternoon in Grande Prairie.

Mr. E. H. Keith is expected home on Tuesday's train. He has been on a lecture tour south of Edmonton for the past month.

There are quite a number of people picking choke-cherries along the creek flats this week. These berries are quite plentiful this year.

### HAZELMERE NEWS

HAZELMERE, Aug. 20.—Mr. and Mrs. E. F. Macdonell and family are back. We hope to stay. Please call when we are at home.

Mr. and Mrs. Len Williams took Mr. Barr, Mrs. Quinn and Mrs. Jordan to the W. L. Conference at Sexsmith and we surely did enjoy it. The handicraft exhibits were really wonderful. The next Conference will be held at Beaver Lodge.

Mr. and Mrs. Wm. Barr and Mr. Chas. Rouff have been visiting with Mr. and Mrs. Len Williams before returning to their home in Vancouver.

Harvesting is in full swing here and crops are very good considering the dry season. But the prices!!

Congratulations to Mr. and Mrs. Joe Barrett on the birth of their daughter (Barbara Joan).

### Not Courteous

After supper the speaker began his boring address saying, "Well, my good friends, have you ever stopped to think?"

A dismal voice answered, "Did you ever think to stop?"

Only 7,700 of the 35,700 radio broadcasting stations in the world are engaged in broadcasting entertainment. The others are used for radio communication with ships, aircraft, etc.

### TWO RIVERS

#### DISTRICT EXTENDS SYMPATHY

TWO RIVERS, Aug. 22.—This district extends sympathy to Mrs. P. Perdue and family of Halcourt and to Alf and Bill of this district on the death of their brother, Peter Perdue. The many friends attended the funeral service in Halcourt Church on Sunday, August 21. Rev. Geo. A. Shields officiating. Mrs. D. McNab was at the organ. The casket was covered with floral offerings from his many friends. The pallbearers were brother Masons. Interment took place in Halcourt cemetery.

#### ANNIVERSARY SERVICE WELL ATTENDED

The Halcourt anniversary service was well attended. The Rev. A. Willis Cann was special speaker and everyone enjoyed his inspiring address. We wish to thank Mrs. Cann for her lovely solo.

The Beaver Lodge girls' orchestra certainly are to be congratulated on the way they took charge of the music and we hope to have them come soon again.

Everyone enjoyed the variety of flowers and the lunch which followed.

The McNabs, Locks, Rutledge and Madeline went to Grande Prairie.

Eugene Probst lost a young horse, and Mr. Harrop and Les Longson have sick horses.

There was a heavy frost today and beans and corn look sick.

Mr. Brewer inspected the work done on school and thought the Two Rivers ratepayers are to be congratulated on their cooperation.

Betty, Norman, Allan, Doreen, Marguerite, Dalton and Melvin attended Sunday school.

The L.O.E. will meet at Mrs. Chas. McNaught's on Saturday, August 27, at 3 p.m.

### GORDONDALE

#### GOOD YIELDS PROMISED

GORDONDALE, Aug. 18.—What with showers too numerous to mention, it is a foregone conclusion that the grain cannot help but fill to the limit. That is the weather report for the past two weeks. The first two frosts on the 10th and 11th. They affected a very small portion of the settlement only and the precise damage to the grain will not be known until the threshing machine has done its work.

Most everyone who owns a binder has started to or is ready to cut the grain, but showers are retarding operations to no little extent. No bumper yields are expected from the earlier crops, but the later fields promise good yields providing there are no more frosts.

Quite an amount of breaking has been done and some are still at it, one of whom is Arnold fulfilling the Radke contract with A. Sunday, with the Radke "cat" outfit.

A petition is being circulated with the hope of being able to work off back taxes on the roads-to-be. Another ideal summer gone begging so far as roads are concerned in this district. Perhaps we don't holler loud enough to prove the old proverb "the heel that squeaks the loudest gets the most grease." Let's hope something materializes from this petition.

Mr. Currie was with us again on the 7th and will be with us again on the 21, and a good congregation was again in attendance to hear him deliver a most impressive sermon on the subject of "The Church walked with God." May Mr. Currie live long to carry on the great cause.

Rev. J. W. Donaldson cancelled his engagement on Sunday, August 14, owing to rain and condition of the roads.

The G.W.W. held their picnic on the 12th, at Kirk's grounds, and a very enjoyable time was had by all. Some visitors were present from Bear Creek and Bonanza, somewhere about twenty. The H. Pegg and S. Collins families were present at the dance which followed in the evening, both coming from Blueberry Mountain by car.

The District Nurse was visiting her patients in the district, accompanied by her sister, Miss Helen Sage, and intends to visit the district once a month. Anyone desiring to contact her may do so by leaving a message at Mrs. M. McKay's.

Mr. Paul Radke, the stockkeeper, has returned home from St. Joseph's Hospital, Dawson Creek.

Mr. J. McMillan and Mr. D. Menzies visited Spirit River last week to consult the doctor there concerning their health. Nothing is seriously wrong with either, but both being 80 years old any slight ailment might become serious if neglected.

#### WILL MISS JIMMY HARPER

Many sincere regrets are felt by all in this district with the passing of genial Jimmy Harper, as we all knew him. His absence from Spirit River will be a void which will be very hard to fill. His friendly hand on the shoulder will live long in the memories of all those who had the pleasure to know him.

Fire Ranger Woods was in the district on Wednesday looking for men. Although no smoke can be seen on the horizon, ground fires are burning in several places and next month, when vegetation is dead or dying, the fire hazard will be as serious as any time during the summer.

#### MODERN OCEAN LINERS CROSS ATLANTIC AT GREAT SPEED

Trans-Atlantic greyhounds have clipped almost a full day off the record crossing-time in the past decade.

In March, 1930, the German liner Europa made the westbound crossing of the Atlantic in four days, 17 hours, six minutes to lift the blue ribbon—21 hours, four minutes more than the British liner Queen Mary required on the record-making voyage completed in three days, 21 hours and 48 minutes.

### GOODWIN

GOODWIN, Aug. 22.—O. Krause and C. Dobson attended to business in Grande Prairie the other day.

The Willing Workers met at the home of Mrs. MacDonald on Saturday. After their regular meeting and the distribution of articles to be made up for their bazaar this fall a dainty lunch brought the meeting to a close. Their October meeting will be held at the home of Mrs. Crowe.

H. Blow came in from Calgary on Thursday and reported the roads muddy.

Mrs. Goodland visited with Mrs. J. Lenes on Friday afternoon.

Mr. MacDonald has been on the sick list the past week.

Reg. Crowe, accompanied by Cherry, spent Saturday in Grande Prairie.

### BEAVER LODGE

#### JOTTINGS

BEAVER LODGE, Aug. 23.—Quite a number from Beaver Lodge attended the anniversary service at Halcourt United Church on Sunday, August 21. Tennyson's girls' orchestra supplied the music.

Jack Patterson and C. Tennyson left Thursday for Saskatchewan. Fred Reid, who has been acting as first aid man for the Monkman Pass trail cutting crew, accompanied them as far as Vegreville, and will resume his medical course at the University of Alberta in September.

The Boy Scouts, under Scoutmaster Bert Sumner, returned last week from their annual camp on the Red Willow and report a most enjoyable time. Since their return the camp has been occupied by the Cubs, who will return this week. The Cubs are having the time of their lives and are loath to return. A number of their parents visited the camp on Sunday.

Mrs. Tyrrell and Edna left last week on a motor trip to Vancouver and other Coast points.

The lure of the Monkman Pass, with its scenic beauty, big game hunting, superb fishing and big game hunting, will make it one of the most attractive routes for tourists when the highway is completed. In the latest party to leave for Kinuso Falls were Mr. and Mrs. A. Smith of Lake Saskatchewan, Mrs. George Martin of Edmonton, Mrs. J. R. Beaver Lodge, and Miss Campbell of Calgary, who expect to return the end of this week.

Rev. Dr. Armstrong and Mrs. Jas. McCreel of Vegreville were visitors at J. R. Moore's last week. Harvesting is in full swing, with around 35 per cent of the grain cut. Showery weather has delayed cutting considerably.

### HALCOURT NEWS

## Peter Perdue Laid In Last Resting Place Sunday

HALCOURT, Aug. 22.—The community of Halcourt extend their deepest sympathy to the family and relatives of the late Mr. Peter Perdue, who was buried in Halcourt cemetery on Sunday, August 21.

Mr. Perdue came here a year ago last May, and although very quiet and unobtrusive in his ways made himself a host of friends in the short time he was with us.

Left to mourn his passing are his widow, three children, and brothers William, Alfred, Jim and Tom, and three sisters.

The funeral service was held in Halcourt United Church, Rev. Geo. A. Shields conducting. The church was filled to capacity by the friends and relatives of the deceased, and the numerous wreaths and sprays were an indication of the esteem with which "Pete," as we all knew him, was held in the community.

The music was provided by the bearers and J. B. Oliver had charge of funeral arrangements.

### ELMWORTH NEWS

ELMWORTH, Aug. 12.—We are glad to hear that the Shields and Moyers are back with us again after their long holidays. They reported a nice trip and a very good time.

Mr. and Mrs. W. Barr and Mr. Roope came back with Moyers and intend to stay a while. They think there are some very good crops here and reported seeing some very poor ones along the way. The Barrs and Mr. Roope motored out from Vancouver, where they reside.

Welcome back also to the J. F. Smith and Hinton Trail, who motored out some time in June. They were glad to get back and see good crops around home.

The picnic at Elmworth held for the benefit of the Monkman Pass Highway on August 12 was a real success in spite of the cold, windy day. Rain fell later on in the day, which makes lots of mud and things very disagreeable for the women trying to serve the hungry people. There were races and games played, to say nothing of the married ladies' softball team. Refreshments of all kinds were to be had and the very best of lunch, also hot dogs. We were glad to welcome Mr. and Mrs. A. Smith, who gave us an interesting talk on what's going on at the highway, also showing some nice snapshots taken on the highway. We sincerely hope that our little donation will build a mile or two. Sorry the weather discouraged so many people who intended going.

#### OUT OUR WAY

Slim moved into his new home. Ward has ceased operations on his home till a further date.

Cutting grain will start soon. Some good gardens around here, but majority of the others quite poor. Raspberry crop good along the creek.

Marie and Sheila spent a few days with Allan and Dorcas.

Jim putting up a new hen-house. We hauling lumber from the mill. The old gallop refused to budge along the highway. Smitty went to the rescue.

W. L. Hinton, at Mrs. L. Williams last Thursday.

Congratulations to the G. Moyers on the arrival of a baby girl.

Dewey looking for the winning money.

Sid trying to coach the married women on softball.

A new official bounce. Guess who.

Who is the best catcher in softball? Bessie trying to sell the white poodle.

Kate winning the pin cushion. Al wanting to get a girl who could make just such lemon pie.

## The Snapshot Guild

### PICTURES AT THE FAIR

Stock showings provide snapshot chances at the fair—and so do many other events. Take the camera wherever things are going on!

EXHIBITIONS and county fairs supply a wealth of picture material for the busy camera. So do street fairs and carnivals. Take your camera along when you visit these lively affairs, and you'll have no difficulty keeping it active all day long.

On such occasions, there is always plenty going on, and wherever things are happening one can find subjects for pictures. Especially do these events offer opportunities for the "off-guard" type of story-telling snapshots. The vendor of toy balloons making a sale, the fat man munching a hamburger at a midway booth, the "barker" in front of a sideshow, the child gazing longingly at the merry-go-round—these are but samples of the dozens of picture

chances you may find in an afternoon's visit. And there are many other types of snapshots to take. One always finds concerts and exhibits, ranging from home-canned peaches to corn watermelons, chocolate layer-cakes and the "best bushels" of corn. Snapshots of the judging, as well as the exhibits, make good pictures for your collection. Too, there are horse and livestock shows that offer many picture-taking possibilities. Keep your eyes open, try to capture the spirit of the fair in all its aspects, and you will come home with a pocket full of good snapshots. These occasions just give point to an old rule—if you want really good pictures, take plenty of them. Take the camera where there's something going on!

John van Guilder.

### ALBRIGHT NEWS

#### MEETING OF W. A.

ALBRIGHT, Aug. 22.—On August 11, the Albright W. A. held their regular meeting at the home of Mrs. M. E. Byers. The seven members and seven visitors present spent a very pleasant afternoon. A letter was read from Rev. J. E. Ball, now at Airdrie, thanking the W. A. for the gift of ten dollars. Mrs. Peters reported several visits made to the sick on the east side of the river and Mrs. Byers was appointed to take her place on the visiting committee for the next three months. A delicious lunch was served by the hostess, assisted by Mrs. Byers.

The next meeting will be on September 8, in the hall. All members are urged to attend and we are always glad to have visitors. Everyone is asked to bring lunch.

#### FINANCIAL REPORT OF SUNDAY SCHOOL CAMP

A financial report made at the W. A. meeting of the Sunday school camp held at Saskatoon Island showed that the cash received was \$22.83 and the expenses were \$21.50, leaving a balance of \$1.33. Donations of money were received from the W. A., Mrs. V. C. Hodges, Mrs. Craig, and \$10.83 was realized from the Sunday school camp by Mrs. Cunningham and Mrs. Byers. There were also gifts of meat and other food.

A donation of \$5.00 from the Young People's Society and the balance of \$1.33 were used to take the Sunday school class to see "Snow White" last Wednesday afternoon. Twenty-six people enjoyed the trip in Mr. Eastman's truck.

Mrs. Allan Eastman and baby Arling are spending a week or so with Mr. and Mrs. Calvin Kyle at Hythe.

Mrs. Cunningham, Sr., left for her home at Vegreville on the Friday train, after having spent several weeks visiting at the home of her son, R. A. Cunningham. Another son, Lorne, lives here and Mrs. Cunningham also visited relatives at Hythe and Valhalla.

Congratulations to Mr. and Mrs. R. C. Pack. They have a tiny baby daughter.

Miss Dorothy Medcalf of the Pouce Coupe Hospital is spending a month's holiday visiting Mrs. V. C. Hodges and other friends here. Dorothy is the luckiest girl we know about—she is getting holidays with full pay.

On Wednesday afternoon the Mission Band are having a hike, starting from the home of Mr. and Mrs. Russell Wright.

Those who attended the flower service on Sunday morning had the pleasure of seeing Mr. Moss again. Mr. and Mrs. Moss and family have been visiting in Hythe lately.

#### HOW TO EASE YOUR OWN CONSCIENCE WHEN PASSING ON COUNTERFEIT COINS

From Le Sorelois, of Sorel, P.Q., comes the solution of a rather common problem in ethics and finance. While the solution is ingenious, it may be as well to state that neither Le Sorelois in publishing it, nor The Printed Word in making a free translation, endorses the morality involved.

The problem is stated thus: "Someone gives you a counterfeit fifty-cent piece. What do you ordinarily do? You attempt to pass it on to another dupe. Don't deny it; on this point we are all alike. But the catch is that, nine times out of ten, you don't succeed. So, discouraged, you put the piece away in a drawer and then decide to stay honest in spite of your money."

Here is how the correspondent of Le Sorelois meets the situation. He says: "A customer buys from me an article worth 25 cents, giving me a dollar bill in payment. I must give him 75 cents in change. I put together my bad fifty-cent piece plus 35 cents in good money, making 85 cents in all, in place of 75c. The customer, seeing that I have given him ten cents too much, hurriedly puts it all into his pocket, for fear that I shall see my error. My piece is gone, with a loss of ten cents, if you like, but I am rid of it. I do not have to reproach myself for cheating my customer, since he himself has been dishonest enough to cheat me. Thus I live in peace with my interests and my conscience."

#### CONFIDENCE MEN TRAPPED

A fake Tyrolean tourist has put the fear of the law into London's "sharepushers" who sell worthless stocks to visiting yokels. The Scotland Yard dressed its most German-looking detective in a good cartoon German costume, including Tyrolean

BANK OF MONTREAL  
CROP REPORT, No. 10

MONTREAL, Aug. 18.—Bank of Montreal crop report, No. 10, issued today, is as follows:

## General

With generally favorable conditions continuing as harvesting proceeds, fulfillment of earlier hopes for good crops of the main staples in every province of the Dominion seems assured.

In the Prairie Provinces harvesting is well under way in Saskatchewan and southern Alberta, while in Manitoba, where wheat cutting is nearing completion, threshing returns indicate that yields generally will be fair to good. Rust damage to non-resistant wheat has become serious in eastern Saskatchewan, causing a further decline in prospective yields. Grasshopper damage has continued in Saskatchewan and crops in affected areas are being cut early to avoid further loss. Hail damage is heavy at scattered points.

In Quebec grain cutting is general, with indications of good yields, and fodder corn, roots and tobacco are all doing well. Tobacco is a large crop, but the yield of apples will be light.

In Ontario, where frequent rains have delayed harvesting operations during the past week, the prospects are for good average yields of all the main crops, with apples somewhat below average.

In the Maritime Provinces crop prospects generally are favorable, though in New Brunswick and some parts of Nova Scotia excessive moisture is causing some deterioration of yield. Apples are sizing well, with indications of good average yields.

In British Columbia yields of grain will be below average, but potatoes are growing well, tomatoes are of good quality, roots generally are satisfactory, and tree fruits are promising.

## Alberta

Recent rains were beneficial to late grains, pastures and root crops, but have delayed wheat cutting, which should be good this week. Average to good yields of potatoes are anticipated in all districts except in the northwest and southeast, where the crops are light. Recent hail damage in scattered areas was not serious. Pastures are in good condition.

## Saskatchewan

Cutting is well advanced in the eastern part of the province and good progress is being made elsewhere. Rust is prevalent over a wide area and its serious development in eastern districts on non-resistant wheat will further decrease prospective yields and grades. Grasshoppers are numerous and crops in some districts are being cut green to prevent further damage. Pastures and late crops benefited from recent rains.

## Manitoba

Although harvesting has been delayed by rains, wheat cutting is nearing completion, except in the northern districts and threshing is becoming general. While rust has caused some damage, yields generally will be fair to good. Early threshed rust-resistant Thatcher wheat, which was sown to a large extent this year, is yielding and grading well. Grains generally are satisfactory. Pastures are in fair condition.

## Province of Quebec

**Eastern Townships and Ottawa Valley.** Cutting of wheat and coarse grains is now general and early threshing results indicate good yields of high quality. Harvesting of a better than average crop of hay of good quality has been completed under favorable conditions in most districts. Fodder, corn and root crops have shown rapid growth recently and have a promising appearance. A large crop of canning tomatoes is being gathered and better yields of sweet corn is anticipated. Apples will be a light crop. Tobacco plants are growing well and grass pastures continue in excellent condition.

**Lower St. Lawrence and Lake St. John District.** Grain crops, which promise average to better yields, are ripening and in some places cutting has commenced. Haying in all but a few isolated sections was completed during the past week and a good crop of average quality is reported. Potatoes, turnips and root crops are showing satisfactory progress. Blueberries and small fruits are plentiful. Grass pastures continue in good condition.

## Ontario

Harvesting operations are well advanced. Threshing of fall wheat nears completion, with above average yields of good quality. Cutting of spring grains is practically completed and threshing is well advanced. A heavy crop of hay of good quality has been stored and pastures have remained in good condition throughout the season. Corn and roots continue to make satisfactory progress. Apples are of good quality and are being delivered to canneries in volume and a heavy yield is indicated. Apples are sizing well, but below average yields are expected. Flue tobacco is ripening rapidly and harvesting is general; a heavy yield of good quality leaf is in prospect. Burley and black-fired varieties on low land have been adversely affected by heavy rains.

## Maritime Provinces

Grain crops are up to average but wet weather has interrupted cutting over large areas and some heavy crops are lodged. Hay is extremely variable in yield and quality, due to adverse harvesting conditions. Digging of early varieties of potatoes has commenced and while rust and blight are reported, especially in low-lying land, the quality generally is good. Apples are sizing well and with a favorable autumn good average yields are indicated. Pastures are excellent.

## British Columbia

Cooler weather with occasional showers has been prevalent throughout the province during the past week. Threshing of grain at interior points is practically completed and harvesting on the lower mainland and Vancouver Island will be general shortly. Yields in all districts will be below average. The second cutting of alfalfa in the interior yields good average crop. Potatoes are growing well and are generally free from disease. It is now estimated that the onion crop will be below average. Tomatoes are moving to market and canneries in volume and are of good quality. All other vegetable and root crops are satisfactory. Shipments of early peaches have commenced from the Okanagan. Apples are sizing well and recent showers have improved the coloring. The following tree fruit yields are now indicated: Plums and prunes, 95 per

## VACANCIES IN ROYAL CANADIAN AIR FORCE

The Royal Canadian Air Force has vacancies for a number of Permanent Commissioned Officers and selections will be made shortly so that training may be commenced on November 1, 1938. To be eligible, a candidate must fulfil the following conditions:

- Of pure European descent, the son of parents both of whom are (or if deceased were at the time of their deaths) British Subjects, or naturalized British Subjects.
- Unmarried.
- Medically fit for full flying duties.
- Between the ages of 18 and 25 on June 1, 1938.
- A graduate of the Royal Military College or a graduate of a four-year course in the Faculty of Applied Science, Arts, and Science, Law, or Forestry, of a recognized Canadian University.
- Otherwise suitable, including appearance, character and personality.

Any young men who fulfil these conditions and wish to apply should do so by letter to the Officer Commanding, Western Air Command, Vancouver, B.C., prior to September 1, 1938.

AERONAUTICAL  
TIT-BITS

By J. W. Neil

## THE BRITISH CIVIL AIR GUARD

Sir Kingsley Wood, Secretary of State for Air, introduced the Civil Air Guard to the press at the Air Ministry on July 23. This beautiful new Air Guard—a silly name, it is regarded by one of a wind-screen or fire-guard—seems to be, in effect, a glorification of the Air League cadet idea, which was announced at the Air League dinner on May 17, plus a scheme of club subsidy which will enable the poor young man to fly if he has been able to spend about as much money on flying as he does at present on going to movies, watching football matches, betting on horses, and buying cigarettes. And if that does not make Britain an air-minded nation, the time has come when they may as well go all pacifist and ask somebody to come and conquer them.

The scheme is to subsidize the training of pilots who must in return undertake to serve in any national emergency in any capacity connected with aviation. Those who are already reservists in any of the King's fighting services will not be eligible, but otherwise applicants may be of either sex, any age from 18 to 50 years and healthy enough to pass the medical tests for "private" license.

The scheme is civilian and is to be administered by a board of five honorary commissioners. Flying training will be done at approved flying clubs. It will not be exclusive to those already subsidized, but each club must be approved.

To make clear the difference between the new and the old schemes: The old subsidy works on the basis of £25 to the club for each new "A" or private license; £10 for each renewal, and 10/- per flying hour up to 20 hours per member per year. The new scheme will continue in force for non-members of the C.A.G.—unfortunate initials. Will the members be known as Cagots?—In French that means either a bigot or a hypocrite. They might be either bigoted enthusiasts or hypocritical trench diggers, or it might refer to the government's hypocrisy in this camouflage conscription. The old maximum of £2,000 subsidy per year will still apply.

Members of the Civil Air Guard will get £50 subsidy for an "A" license earned on a standard training type (above 1200-pound) and £30 if on a light type (below 1200-pound). The Moth, for example, is in the standard class and the Taylor Cub in the light class. Renewal of license will earn £15, irrespective of type.

Flying hours will be subsidized up to ten per member at £2 per hour. This is also the minimum for renewal of license. Extra hours must be paid for at standard rates. The C.A.G. member is not to be charged more than 10/- per hour on a standard type on Saturdays and Sundays, and 5/- for light types. On other days, these charges will be halved to encourage flying in the slack times.

The clubs must also undertake, if they wish to be included in the scheme, to operate a C.A.G. section of at least five members. The scheme will start on October 1, if arrangements can be made at enough clubs.

C.A.G.'s who fly light types in slack periods ought to get their "A" license for little more than £2 (£10). Standard types at week-end rates run into about £9 (£45) for an "A" license—if the pupil is moderately good.

The wording of the announcement was that members must undertake to offer their services at once in a state of national emergency for the purpose of employment in connection with Royal Air Force requirements or in any other direction concerned with aviation—which may be regarded as a temptation by those who want to dodge service in trenches or tanks—the two dirtiest ways of making war.

The wording covers everything from sweeping hangars to driving rivets in shadow factories. But it assures a heavy enrolment. As an inducement to a lot of people, in at least fair health and fitness, to register themselves for emergency service the scheme is quite clever. Those who administer it should, and probably will, make obligatory some ground training. Many amateur pilots manage to fly well without knowing a thing about what goes on under the cowling. They ought to be able to wash an aeroplane without hurting it, dope a patch on, or thread a locking wire.

One thing certain is that the scheme will stimulate designing and building new light aeroplanes. The Americans have gone far ahead where Britain was once supreme, as is proved by the suggestion and permission to the C.A.G. to use foreign machines.

Amateur flying will either go ahead or go out entirely, and the C.A.G. may mark the parting of the ways. If we must have cheap, safe and easy flying aeroplanes, and if we points a practical safety emergency landing grounds, aerial sign posts and all the rest, we must have a market for the goods. The C.A.G. may give it a start.

Fire-and-fly-yourself schemes are an inevitable consequence of the C.A.G. scheme, even though private ownership may never amount to much. If the "youth" (actant 18-50)

of the land respond to the C.A.G. offer, the machinery will have at least a basis on which to grow.

## INCORRIGIBLE

Mr. Corrigan's gamble with the Atlantic last month—we forget his first name and the date, but they do not matter—had two things to recommend it, which is more than most exhibition or stunt flights have. In the first place, nobody knew that he had started to fly the Atlantic, and so if he had disappeared forever no time would have been wasted and no lives would have been risked in hunting for him. Secondly, the sheer silliness of his flight so took the fancy of the equally silly newspapers that he kept a good deal of the line, which would otherwise have been still more concentrated on equally useless flights. Also Mr. Corrigan deserves a good mark for the statement attributed to him, whether truthfully or not does not matter, that because of some vagary of his compass, presumably he was flying on the wrong end of the needle, he thought that he was flying to California when in fact he was flying to Ireland. That this reported remark brought him by cable the award of life membership of the Chicago Lairs Club showed that his qualities were properly appreciated.

His long trans-oceanic flight is justified unless it adds something to human knowledge of air transport, or unless it is done with some new mechanism which adds materially to the safety of such flights.

With the  
Boy Scouts

British Scouts invited to Brooklands a wide open invitation to British Boy Scouts to attend one day of the September motor races at Brooklands has been extended by Earl Howe, the president of the British Racing Drivers' Club.

## Corrigan Formerly a Boy Scout

Douglas Corrigan, who made air history by his flight from America to Ireland, was at one time a Boy Scout in a New York City troop. He declared his hiking experiences had proved of value to him when he took up flying.

The big annual parade of Boy Scouts and Wolf Cubs will not be held at the Canadian National exhibition at Toronto this year. Instead there will be displays of Scoutcraft work of various kinds. The usual large staff of public service Scouts will be maintained, including those who each year are assigned to the special task of finding and caring for lost children.

**U.S. Sea Scouts Cruise to Montreal**  
Summer Scout visitors to Canada included 25 American Sea Scouts from New Jersey, aboard the two 35-foot cabin cruisers "Reliance" and "Gull," which reached Montreal by the inland water route from New York. The U.S. Sea Scouts were entertained by Canadian Scouts at St. John's, Quebec, on the way, and at Montreal were guests of the Royal St. Lawrence Yacht Club Sea Scouts at Dorval.

## Indian Scouts Specialize in Rescues from Wells

Rescues from drowning in rivers, lakes and the sea have become almost a looked-for service by Boy Scouts in all the Scouting countries of the world. In India the Scouts have added the frequent rescue of persons who fall into the many wells from which whole village communities draw their water. A recent typical case was the rescue at Shahalra, Punjab, of a small boy who had toddled to the well and fallen in. The rescuer, Scout Mubarak Ali, called by the child's excited mother, at once dived in, grasped the infant,

THIS CROQUET IS NOT "CRICKET"

Rita Hayworth, one of Columbia's young leading women, is an enthusiastic exponent of this new game which has taken Hollywood by storm. It is a combination of croquet, with a touch of golf thrown in. The daughter of Edouard Cansino, Miss Hayworth was a noted dancer and has appeared in almost every country in the world with her father. Since being placed under contract by Columbia she has been seen in a number of important productions, the latest of these being "Who Killed Gail Preston?" in which she had the feminine lead.

and held it above the water until a rope was procured and lowered by villagers, when both were drawn up to safety.

Of all the inventions of modern times few, I imagine, have done more to increase human happiness than the Boy Scout movement.—Robert Lynd, in the London News-Chronicle.

## Great Camp of Swedish Scouts in King's Park

A great National Camp of Boy Scouts from all parts of Sweden was held during August in the park of Tullgarn, upon the invitation of the King of Sweden, and under H.R.H. Prince Gustaf Adolf as Camp Chief. British Scouting was represented by a contingent drawn from all parts of the British Isles, and one Scout from India.

## A Scout Medal for Sir Abe Bailey

An interesting addition to the list of Cornwall Scout medal awards given for outstanding courage and cheerfulness during continued suffering was that of the South African magnate, Sir Abe Bailey. The award was made by Lord Baden-Powell, "for exceptional courage in facing intense suffering over a long period of time." Sir Abe, a vice-president of the Boy Scouts Association, had one leg amputated in London last year, and the other one early this year at Johannesburg. Following the second operation Sir Abe sailed for England, against his doctor's orders, to see his two horses run in the Derby.

## The Tale of a Cotswold Milestone

In 1844 Simon Pearce left the little village of Randwick, Gloucestershire, and settled in New South Wales, on a site which today is occupied by the city of Randwick, of 67,000 inhabitants. Recently the Boy Scouts of Randwick district village sent a four-cwt. Cotswold milestone to the 1st Randwick (St. Jude's) Scout Troop, as a goodwill tie between the Randwicks new and old. The stone was carried free of charge by the P. and O. liner "Cathay," and personally delivered at the end of its 13,000-mile trip by Captain R. H. Rhodes. A stone previously sent by the people of Randwick village to the church of St. Jude of Randwick, N.S.W., was thrown into the sea by mistake, suspected of containing smuggled dope.

**Swallow This**  
The waiter was called back by the customer, who said, "Take this soup away, there's a button in it." "Sorry, sir," said the waiter. "It's just a printer's error, it should be mutton."

THE WORLD  
OF WHEATBy H. G. L. Strange  
Director, Research Dept., Searle Grain Co., Ltd.

"Why is it," said my friend, whom I will call John Skeptic—for he certainly is a real skeptic—"that in May, 1936, the price of Winnipeg wheat was 73 cents, that in January, 1938, it went up to \$1.54, and that now it is down to 77 cents? Do you think these fluctuations are warranted?"

A careful examination of the records revealed that when in May, 1936, the price of Winnipeg wheat was 73 cents, the Liverpool future was 63 cents—which is the proper price relationship—and that there was available then plenty both of Canadian and world wheat; that by January, 1938, there was considerably less world wheat, so the Liverpool future price rose to \$1.19, but there was proportionately much less, indeed quite insufficient, high strength Canadian wheat, so the Winnipeg price went to \$1.54.

Now, however, the world price of wheat is down again to 78 cents and Winnipeg down to 68 cents, simply because there will soon be more world wheat, and more Canadian wheat, than may be required.

Actually we see in these fluctuations the law of supply and demand in action, showing how prices fall when supplies are abundant, rise when supplies become scarce, and rise very high indeed when supplies become insufficient.

Following factors have tended to raise price:—Threatening European political situation—rumored developments in international currencies—Germany decrees creation of extra storehouses—Millers required to keep two months wheat supply—Italian trade wheat estimates below official—Wet European harvesting weather—Rumanian government recommends more wheat consumption to conserve corn.

Following factors have tended to lower price:—Russia actively pressing wheat and barley. Wheat exports substantial—Improvement reported in United States crops since July 1—Insufficient foreign exchange in continental countries to buy many raw materials—Prairie wheat crop still indicated over 300 million—Broomhall's preliminary estimate import requirements only 548 million.

## The Nit-Wit

Alfred—When she wasn't looking, I kissed her.  
George—What happened.  
Alfred—She refused to look at me for the rest of the evening.

## Musical Notes

By H. L. Vaughan

## THE CARE OF A PIANO

Anything worth owning at all is worth being properly cared for. A piano is expensive and extremely delicate piece of property, the action alone containing about 7,500 parts, all shaped and manufactured with mathematical precision, and a certain amount of care is necessary in order to protect its life and to reduce depreciation to a minimum. The following points should be of interest to those owning or intending to purchase pianos.

There are well over 200 wires or strings used in the construction of a piano, and they are all strung at high tension, exerting a tremendous pressure on the frame of the instrument. The total of that tensile force may, as in the case of the modern full-size grand piano, amount to as much as 36 tons, hence the necessity for solid and honest construction. And as the average person is not equipped to judge of the quality of construction, the name and reputation of the maker of an instrument is an important thing to consider in purchasing a piano.

As metal expands and contracts with changes of temperature, naturally the strings and frame of a piano are very susceptible to extremes of heat and cold. If at all possible, a piano should be kept in a room having an even temperature the year round. It is preferable that it should stand against an inside wall, so that in winter cold air will not collect behind it, and that it should be away from drafts, either hot or cold. Extreme cold or dampness is also injurious to the case of most pianos, particularly to those having a mahogany finish, causing a fine check to appear, which damages the appearance and commercial value of the instrument.

When moving a piano always make sure it is protected from jolts and rough handling, which will cause it to go out of tune, and have it retuned after a move of any importance.

Because of the large quantity of wood, felt, and glue used in piano construction, it is affected by lack of sufficient or presence of excess moisture in a room. The air in most homes is very dry in winter, and this not only causes the piano to go out of tune quickly but has a bad effect on the action, making it loose and causing rattles. An open container of water placed inside the piano helps to overcome this condition to a certain extent. Water leaking into a piano from a plant or vase of flowers often causes much damage by rusting metal and hardening felt parts. The top of a piano is not a good place for plants or flowers.

Great care should be taken to protect the ivories of the keys. Children often carelessly chip them by hammering them with some hard substance. This impairs the value of the piano, as ivories are hard to match, and expensive to replace. Occasionally ivories become loose when glue dries out. It is much better to have them replaced than to attempt to match them with new ones.

Other parts which come loose or break should be carefully saved, as those parts may often be put back into place, while it may be difficult or even impossible to replace them once lost. A broken string in the bass section, for instance, is difficult to replace unless the old string is available.

Mice and moths do great damage if not guarded against. Moths in particular can create havoc without betraying their presence until the damage is done. The best way to guard against them is to have the action thoroughly cleaned each year. Damage is often done to an instrument not in use by storing it in an unsuitable place. A piano is best stored in a room having an even temperature, neither too dry nor too damp, and entirely free from rats, mice or moths.

Pianos should be tuned at least once every year, regardless of the amount they are used. No piano will stay in tune for a longer period of time even if not in use. One in constant use should be tuned oftener, but once a year is a safe rule in most cases. Neglect in this matter simply adds to the expense when the instrument is eventually put in shape. Any student of music should at all times be certain that the instrument upon which he practises is accurately in tune. Practice on an instrument which is out of tune dulls the ear to imperfections in intonation, and causes the piano student to play wrong notes without knowing it, and the vocal student to sing off pitch, also without knowing it.

Any person intending to buy a piano should always consult an expert. Often a piano, like an automobile or a horse, appears to be a wonderful bargain, but when exam-

ined by one who understands them, it is found to be worth considerably less than the price quoted. Never buy a piano because it is cheap. Get the advice of an expert, for it may be worth far less than you expect to pay.

MINUTES OF MUNICIPAL DIST.  
OF GRANDE PRAIRIE, NO. 739

Minutes of a regular meeting of the council of the Municipal District of Grande Prairie, No. 739 held in the municipal office on Saturday, August 13, 1938.

Present: Reeve Tinsington, Councillors McLaughlin, Corlette, Garrett, Huber and Nelson.

The minutes of the council meeting of July 9th were read by the secretary. Nelson: That the minutes be adopted. Carried.

The minutes of the special meeting of July 28 were read by the secretary. Corlette: That the minutes of the special meeting be adopted. Carried.

Mr. Wm. Wagar attended the meeting regarding a road allowance on Kiskin Hill.

Corlette: That Wm. Wagar be advised that Mr. A. Thompson has given him (Mr. Wagar) liberty to move the fence at the S.E. corner of the S.E. of 24-72-4. Carried.

Mr. A. Alderman attended the meeting and presented a petition regarding a road allowance between the North and South halves of Sections 35 and 36, T.P. 22, R. 4.

Garrett: That Councillors Tinsington, Nelson and McLaughlin be a committee appointed to investigate the petition, to meet at 2 p.m. Thursday, August 18 at the home of Mr. A. Alderman. Carried.

Huber: That the financial statement for July be received and placed on file. Carried.

McLaughlin: Regarding an application for relief, received from the Bureau of Relief re Mrs. Callow, the R.C.M.P. be informed that the husband of applicant is quite capable of supporting himself. Carried.

Tinsington: Dr. A. M. Carlie having reported that a well in the vicinity of Lindsay, S.D. was infected, the Board of Trustees of Grande Prairie S.D. No. 14 be asked to take what action it sees fit to have the well filled in. Carried.

Corlette: That burning permits be issued by the secretary only. Carried.

Huber: That road allowance survey be requested and Mr. McLaughlin be paid. Carried.

Garrett: That Councillors Tinsington and McLaughlin be asked to interview Mr. Wagar regarding unemployment labor relief. Carried.

Tinsington: That the council of the Municipal District of Grande Prairie No. 739 request the District Engineer to advise the District as to whether or not the District is not financially able to provide social services and as a condition to obtaining such services, the District agree to comply with the terms of this agreement as outlined in Dept. circular 13-74-4. Carried.

Mr. L. McLaughlin, grade foreman, reported on the municipal grading machinery.

Nelson: That \$8.50 be allowed H. J. Reed for the purchase of 1.20 acres of road allowance taken from the S.E. 13-74-4 and applied against the taxes on this land. Carried.

Corlette: That the following correspondence be disposed of as follows: L.C.M.P. bill of \$28 re refund expenses re A. J. Harvey. Referred to the July 7, filed; Dept. of Agric. letter of July 30 re sleeping sickness in horses, filed; Employment Service of Canada letter of August 1, filed; letter of June 30 re road surveys, filed; W. G. LONDON'S ATTRACTIONS INTRIGUE DANISH BOYS

A contingent of Danish Boys' Brigade is in London on a sightseeing tour of the British capital and a number of British Boys' Brigade have gone to Denmark on a similar mission. This picture shows the Danish boys gazing with interest at the immovable horseguard at Whitehall.

JAPANESE INVASION HAS PRODUCED CRACK FIGHTING MAN IN WAR-TORN CHINA

Paradoxical though it may seem, the nation that originated military science as it exists today has only recently raised the word of "soldier" to an honorable place in its language. Until Japan's undeclared war unified China's military forces and brought millions of Chinese to arms in defense of their native land, the word "soldier" was almost a term of profanity to be hurled at an enemy. About twenty-five years ago the Chinese soldier in appearance was a buffoon who went to war carrying his pet bird in a cage, his favorite tea pot and an umbrella painted with an inscription designed to insult the enemy. Today China's fighting men has become one who can take his place beside the most seasoned campaigner without loss of prestige.

HEIR TO AUTO MILLIONS VICTIM OF TRAGIC HONEYMOON

A few hours before he planned to return to Detroit with his Canadian bride after two weeks' honeymoon, Daniel Dodge, heir to the automobile millions, was drowned while being rushed to hospital with serious injuries. A stick of dynamite exploded in the garage of the Dodge summer home in the Georgian Bay, shattering Dodge's arm and inflicting serious wounds, and injuring four others, including his wife, the former Ann MacDonald of Gore Bay, Ontario. During the desperate attempt to rush the victims to Little Current by motorboat Dodge disappeared from the boat and was drowned. Upper picture shows the summer home of the Dodge family. Lower picture: the garage in which the explosion occurred.

THE FINEST SHOT IN CANADA

Captain A. C. Lucas, Queen's Own Rifles, Toronto, seen above when he won the Governor-General's Gold Medal and title of the finest shot in Canada at the annual meeting of the Dominion of Canada Rifle Association at South March, Ontario. More than 500 marksmen from all over Canada competed for the prize.

ATTEND WORLD YOUTH CONGRESS

Four prominent delegates to the World Youth Congress at Vassar College, photographed as they arrived in Vancouver after visiting China. Left to right, Bernard Floud, son of the British High Commissioner to Canada; Grant Lathe of McGill University, Montreal (sitting); Milly Zard of France, and James Glugman of the United States. They represented the youth councils of the four nations.

FRUIT GROWING ON THE PRAIRIES

The prairie farmer will soon be growing delectable bronze-gold apricots on his land if the successful experiments at the Dominion Experimental Farm at Morden, Manitoba, are any criterion. Our photograph shows the harvesting of the "Scout" apricots, known as "Morden 600" from a 12-foot apricot tree which bears apricots 1½ inches long. The original seed was received as an exchange from a co-operating horticulturist in Manchuria, and has proved very successful. It is hoped the "Scout" apricot experiments at Morden will lead to a series of hardy quality apricot trees in prairie gardens, in addition to the apples, pears, cherries and other fruits which the Dominion Experimental Farms have made possible.

TRAGEDY PARTS BRIDE AND GROOM

Married only two weeks, the happy bridal couple above, Danny Dodge, 21-year-old heir to the automobile millions, and his bride, the former Ann MacDonald of Gore Bay, Ontario, were the victims of a strange tragedy which resulted in the death of the bridegroom and serious injuries to Mrs. Dodge.

DUKE SEES NEW RUINS OF POMPEII

The Duke and Duchess of Windsor paid a visit to the recently unearthed ruins of Pompeii before returning to France. This picture shows the Duke walking through the ancient ruins while an Italian official explains various details to the Duchess.

A STAR WITH A BRACE OF SPANIELS

Miss Hepburn, who is co-starred with Cary Grant in Columbia's "Holiday," likes to spend her time off the lot in slacks and sweater. With her two cocker spaniels, she keeps in condition by long walks. In addition she plays a good game of golf and several seasons ago was runner-up in the Connecticut Women's State Championship tournament. The Columbia star comes from the stage, where she appeared in numerous Broadway productions. Her performance in the feminine lead in "The Warrior Husband" carried her to stardom, and led to her being drafted by Hollywood. Following her screen debut in a "Bill of Divorcement," she played the leads in a number of outstanding pictures, including "Little Women," "Alice Adams," " Sylvia Scarlett," "Mary of Scotland," and "Stage Door."

SHIPWRECKED SAILOR: "Thank Heaven! Civilization again at last!"

## By the Gleaner

Mrs. T. A. Norris of Peace River is visiting her brother and sister-in-law, Mr. and Mrs. G. W. Simpson of Grande Prairie.

Mr. and Mrs. Haan and family and Mrs. W. Durda and baby, who have been visiting relatives at Provost for the last two weeks, returned on Wednesday last.

Mr. and Mrs. D. M. Silliphant, after a week's visit in Edmonton and Calgary, returned on Sunday evening.

Mr. and Mrs. Sanger-Davies, after a three months' visit with relatives and friends in England, returned on Friday's train.

Mrs. T. W. Lawlor gave a farewell tea on Saturday for Mrs. F. MacDonald.

Mrs. G. Chard and Allen were among the truckload of those who left on Monday to view Kinuso Falls. They are expected to return today or tomorrow.

Mrs. W. J. Thomson entertained at the tea hour on Tuesday in honor of Mrs. F. MacDonald.

Miss Mounthele Cameron of Wainham is the guest of Rev. and Mrs. A. Willis Cann while writing her examination.

Mrs. A. M. Carlsle and family, the Butchart boys, Bobby and Donny, the Turner boys, Charlie and Frank, and Harry Newton returned on Wednesday of last week from camp at Lake Saskatoon.

Miss Lona Ward, after three weeks' holiday in Edmonton and other points, returned on Sunday's plane.

Miss Muriel Fish plans to leave this week-end with the Lance Smiths and to spend her vacation with friends in Calgary.

Mrs. Rex Harper visited the Fentons at East Keesun on Sunday and brought Miss Fenton back with her. On Tuesday Mrs. Harper and Miss Fenton visited the former's parents, Mr. and Mrs. Ventress, at Albright.

Miss Margaret Moon, who has been visiting relatives in Edmonton for a week, returned on Saturday by car. Miss Dorothy Moon, Margaret's cousin, returned with her to visit here until school starts.

Miss Vera Guthrie of Fairview spent the week-end with her parents, Mr. and Mrs. F. Guthrie.

Things We'd Like to Know. Who are the Three Graces who, clad in shorts, gallop for two miles every morning to retain their girlish outlines—and where do they run to?

Mrs. Carter and Shirley of Niobe and Miss Agnes Kinderwater of La Glace are spending a few days with Mrs. Carter's father, Mr. Henn, while Agnes writes her supplementary exams.

Miss Mary Archibald of Fairview was a week-end guest of Miss Kathleen Guthrie.

RECEPTION TO REV. T. D. JONES FRIDAY EVENING, AUGUST 26

Rev. and Mrs. T. D. Jones, from Colinton, Alberta, arrived in Grande Prairie by car on Wednesday.

Mr. Jones succeeds Canon Pierce as rector of Christ Church.

There will be a reception to Mr. and Mrs. Jones in the Speke Hall on Friday evening, August 26, at 8 o'clock, to which all members of the congregation are invited.

## Wedding Bells

**WHITLOCK-SMITH**  
A quiet but pretty wedding took place on Saturday, August 20, at 9:30 a.m., at the home of Mr. and Mrs. A. A. Smith of Grande Prairie when their youngest daughter, Kathleen Anne (Kae), became the bride of Arthur George, eldest son of Mr. and Mrs. J. A. Whitlock, also of Grande Prairie.

A flower-decked room provided a lovely setting for the ceremony, which was performed by Rev. A. Willis Cann in the presence of immediate relatives.

Given away by her father, the bride entered the room to the strains of the Wedding March played by Mrs. A. W. Cann.

The bride wore a gown of white and blue sheer over satin with a corsage of white chrysanthemums, and was attended by her sister, Florence, who wore a white flowered sheer and pink chrysanthemums. Mr. Robert Field was his brother's best man.

After the ceremony a wedding breakfast was held at the Palace Cafe.

For travelling the bride chose a brown coat worn over a dress of ruby crepe. Her accessories were brown.

The happy couple left immediately by motor for Kindersley, Sask., to the place Mr. Whitlock has been transferred.

## Paragraphs of Personal Interest

Mr. and Mrs. Treille, Gordon Mates, Herb Robertson, Mac Hopkins, Marie, Kay and Ronald, took in the talks on Wednesday night.

Miss Christie Napoleon of Horse Lake visited friends in Grande Prairie over the week-end.

John B. Diederich, brother Mike, and his son Henry and daughter Annie were visitors to the Prairie on Monday.

Bill LaValley of Debolt paid Grande Prairie a flying visit on Monday.

E. Oland, Harris Hanson, O. M. Heggund of Valhalla Centre spent a few hours in Grande Prairie last Friday.

Norman Cuthbertson and Miss Gladys Cuthbertson of Oids, Allan Mather and Miss Margaret Clark of Berwyn were recent guests at the home of the former's uncle, Edgar G. Cuthbertson of Wembley.

Cliff Ward of Hythe is Elmer Canning's guest.

C. V. Bennett, barrister of Stettler, who was visiting his daughter, Mrs. R. Knobbe of Goodwin, left for home by plane on Monday morning.

A. Katzin, representing Western Canada Importers, of Calgary, is covering the Peace River for his firm.

T. Friberg, C. Björke and Martin Swanson of La Glace spent a few hours in the Prairie on Monday.

Cliff Oze of Edmonton, formerly of Sexsmith, was a passenger on Tuesday's train, en route to Dawson Creek.

A. W. Sharp, postmaster at Dawson Creek, took the train at Grande Prairie for home, after attending the Postmasters' Convention at Peace River. He reports a most successful trip.

**DE BOLT CHURCH**

**CLAIRMOUNT UNITED CHURCH**  
Sunday School and Church Service discontinued during July and August.

**CHRISTIAN SCIENCE**  
At all Christian Science churches next Sunday the subject of the Lesson-Sermon will be "Christ Jesus." One of the Scriptural quotations contained in the Lesson-Sermon is 1 Corinthians 15:20, "But now is Christ risen from the dead, and become the first fruits of them that slept." One of the correlative passages from "Science and Health with Key to the Scriptures," by Mary Baker Eddy, is: "The resurrection of the great demonstrator of God's power was the proof of his final triumph over body and matter, and gave full evidence of divine Science, evidence so important to mortals. The belief that man has existence or mind separate from God is a dying error. This error Jesus met with divine Science and proved its nothingness" (p. 42).

meeting. One of the highlights of the trip, he observed, was a corn feed at Early's farm, served with plenty of butter and all the rest of it. Mr. Sharp further stated that the flowers growing at the Early farm were gorgeous and worth travelling miles to see.

**CORRECTION**  
In Paragraphs of Personal Interest last week Jack Lopenman was said to have visitors. The name should have been Jack Lupman.

**BORN AT MUNICIPAL HOSPITAL**

To Mr. and Mrs. A. Peters, Wembley, August 20, a boy.

To Mr. and Mrs. J. Marvin, Grande Prairie, August 22, a boy.

To Mr. and Mrs. W. H. Smith, Voking, August 23, a girl.

To Mr. and Mrs. Roy Olson, Valhalla Centre, August 23, a girl.

To Mr. and Mrs. James Clarkson, Grande Prairie, August 24, a girl.

**CARD OF THANKS**  
We wish to thank all our friends and neighbors for their kind expressions of sympathy to us in our recent sad bereavement.

John and David Livingstone.

**THANKS**  
To those who so energetically assisted in controlling the recent fire at my place, and to my neighbors, who so generously supplied me with harness to enable me to go ahead with field work, I hereby say "thank you."

J. L. MCINTOSH, Dimdale.

**OLDTIMER VISITING FORMER STAMPING GROUNDS IN BLOCK**

Mr. and Mrs. Shepherd of Ogden, Utah, were passengers on Friday's train, en route to Rolla to visit the former's mother, who he hasn't seen since 1925.

Mr. Shepherd took up a homestead between Dawson Creek and Rolla in 1911, where he lived until 1915, when he went across the line.

In conversation with The Tribune reporter at the Grande Prairie station, Mr. Shepherd told of joining a packing party in charge of Malcolm Campbell when the latter was packing a survey party through the western area. "And believe me, Malcolm was some packer," added Mr. Shepherd.

This is Mrs. Shepherd's first trip to the Peace River and she was very much interested in everything she saw along the way.

The Shepherds will return on the next train.

**F. SCHILL OF RIO GRANDE BACK FROM TWO MONTHS TRIP IN UNITED STATES**

"The United States government is sure tightening up on its immigration laws." This statement was made by The Tribune reporter by Frank Schill of the Rio Grande district at the railway station in Grande Prairie on Tuesday, while he was en route home from a two months' trip across the line. The trip was made primarily to visit his sisters at Pittsburgh, Pennsylvania, who he hadn't seen for 27 years.

Mr. Schill explained that he had to deposit a Dominion \$500 bond before he could be admitted into the United States, adding that if he had been going only to a border city, instead of to Pittsburgh, he no doubt would have been admitted without the security, which was given back to him on his return.

Mr. Schill attributed this tightening up of the immigration laws to the unemployment situation, which is getting worse.

In discussing conditions in the United States, Mr. Schill said that those who were working were getting good wages. Those out of work were receiving relief money, many of whom still run their cars as before.

Mr. Schill, who was born in Pittsburgh, said that so many changes had taken place the old town no longer looked like "Home, Sweet Home."

Other places visited were Yellowstone National Park, St. Louis and Mammoth Springs, Arkansas.

Mr. Schill, who was looking "in the pink," observed that he got back just in time to help with the harvest and was pleased to learn that the crops in the Rio Grande area were very good.
